Introduction

Thank you for providing the information regarding the G.etna effort. At the time of our meeting, we were able to review the liaison letter but were unable to look at the G.etna draft itself. We look forward to providing feedback in the future.

The Ethernet in the First Mile (EFM) Task Force would like to keep you informed of the work in EFM. To assist you in the review of this work, we have a public website available at http://www.ieee802.org/3/efm/public. We are also willing to provide your committee members with access to draft 1.2 of IEEE P802.3ah as soon as it is available. Please limit the distribution of this draft to the members of your committee. It is our practice to place draft documents on a password-protected private web site.

Proposal

We invite Q.12/15 to review the EFM draft specification and provide us comments. Also, please contact us in the future if specific issues arise during your work on which you would like our input.
