TITLE: Communication to ITU-T SG15 from IEEE P802.3ah Ethernet in the First Mile Task Force
REFERENCE: Communication Statement from ITU-T SG15 to Jim Carlo dated 10 August 2001

COMMUNICATION STATEMENT

TO: ITU-T Q4/15 (Stephen Palm, G.VDSL Associate Rapporteur, palm@kiwin.com)
COPY: Geoff Thompson, IEEE 802.3 chair gthompson@nortelnetworks.com
Howard Frazier, IEEE 802.3 EFM chair; millardo@dominetsystems.com

APPROVAL: Agreed to at IEEE 802.3 EFM interim meeting, Los Angeles, California 10/19/2001
FOR: Information / Action
DEADLINE: 10 December 2001

CONTACT: Jim Carlo IEEE 802 chair; j.carlo@ieee.org

The IEEE P802.3ah Ethernet in the First Mile (EFM) task force appreciates the communication sent from study group 15 concerning its work in the area of 802.3 format frames transport in the Subscriber Access Network.

We thank you for the detailed recommendation and reference and we are strongly advising our members that they should refer to the records recommended in your liaison. At the moment, due consideration is being given to multiple transport proposals according to the agreed objectives of our task force. Our attention has been drawn to the work of ITU SG15 by your liaison (SC-097R2) and the presentation given by Marc Kimpe (http://www.ieee802.org/3/efm/public/sep01/kimpe_1_0901.pdf) during the October 2001 interim meeting.

The EFM task force looks forward to a continuing dialog with the participants of the Q.4/15 effort, and we welcome their attendance and participation at our upcoming meetings.
