Dear Roger:

Thank you for your letter of 10 September, 2001.

P802.3ah would be pleased if you would make your drafts available to our group for information and review. We feel that the easiest way to accomplish this would be the same sort of mechanism as that used for liaisons to 802.1 from other Working Groups. The login and password is provided to the liaising group. Any who actually wish to provide comments during your balloting process will have their comments considered as Observer comments. Additionally, this will provide our members with the opportunity to examine your drafts before they are approved (+ 9 months).

We appreciate your offer to allow us to consider your solutions to problems that you consider to be similar to those for EFM PON. In light of your recent request for an evening tutorial slot in Austin on the features and functions of the 802.16 MAC, I would be happy to encourage the P802.3ah membership to attend this tutorial, and thus make best use of the available meeting time.

Thank you for your continued interest in our work.

Sincerely,

Howard Frazier Jr.  
Chairman, P802.3ah
