                                                                          9
REQUESTED REVISION:                                                      10
    STANDARD:           802.3REVam or 802.3ah-2004                       11
    CLAUSE NUMBER:      60                                               12
    CLAUSE TITLE:       Physical Medium Dependent (PMD) sublayer and     13
                        medium, Type 1000BASE-PX10 and 1000BASE-PX20 (long  14
                        wavelength passive optical networks)             15
                                                                         16
PROPOSED REVISION TEXT:                                                  17
                                                                         18
Replace the term "4 octets" in 60.7.13.1 in the definition of           19
Tcode_group_align with "4 ten-bit code-groups".                         20
                                                                         21
RATIONALE FOR REVISION:                                                  22
                                                                         23
Tcode_group_align is clearly defined in section 36.3.2.4. The definition 24
in 60.7.13.1 uses the term octet which could be confused for 8-bit      25
values. Besides, we now have two things that define the same thing      26
differently. Lets just use what we did in 36.                           27
                                                                         28
IMPACT ON EXISTING NETWORKS:                                            29
                                                                         30
None. This should be an ER.                                             31
                                                                         32
                                                                         33
