PROPOSED REVISION '	TEXT:
This primitive is g	generated by the RS when it receives Assert LPI encoded
on the receive xMI	-
RATIONALE FOR REVI	
	ays 'This primitive is generated by the PHY when it
-	gnal or a wake signal from its link partner'. Figure 78-
	at LPI_IDLE.indication is generated by the RS and not
	.3.2 says the value of the primitive is determined
	ding on the MII interface so the reference to the wake
signal is incorrect	t.
