DATE:                 14 November 2018 (update)                                     5
NAME:                 Marek Hajduczenia                                             6
COMPANY/AFFILIATION:  Charter Communications                                        7
E-MAIL:               marek.hajduczenia@charter.com                                 8
                                                                                    9
REQUESTED REVISION:                                                                10
   STANDARD:          802.3-2018                                                   11
   CLAUSE NUMBER:     77, 64                                                       12
   CLAUSE TITLE:      77.3.3.6 State Diagrams, 64.3.3.6 State Diagrams             13
                                                                                   14
PROPOSED REVISION TEXT:                                                            15
Replace all instances of 'flag_rx' with 'flags_rx' in Clause 64 and               16
Clause 77 alike. No other Clauses in Section 5 use this variable.                  17
                                                                                   18
Add the following definition in 77.2.2.3 and 64.2.2.3 after grantStart             19
variable:                                                                          20
                                                                                   21
flags_rx                                                                           22
TYPE: 8-bit unsigned                                                               23
This variable holds the value of the Flags field from the last received           24
MPCPDU.                                                                            25
                                                                                   26
RATIONALE FOR REVISION:                                                            27
The following figures in Clause 64 and 77 make use of the variable /               28
parameter defined without definition, i.e., 'flag_rx'. In two locations,          29
a similar parameter is used, i.e., 'flags_rx' (difference in naming was           30
underlined and bolded). Neither of these parameters is defined today.             31
                                                                                   32
IMPACT ON EXISTING NETWORKS: None, it is just a fix in the description of          33
state diagrams in Clause 64 and 77 alike.                                         34
                                                                                   35
