"Ethernet Bandwidth Assessment" Program Submission

Background and Purpose

During the IEEE P802.3ba 40Gb/s and 100Gb/s Ethernet project, it was observed that core networking and computing applications were growing at different rates, driving the need to develop the two new wireline Ethernet speeds. The focus of this IC activity will be to perform an appraisal of future "Ethernet Wireline Bandwidth Needs" of applications within the Ethernet eco-system.

Related Standard – IEEE Std 802.3-2008 and IEEE Std 802.3ba-2010 Related Sponsor – IEEE 802

Charter and Scope

The scope of this IC will focus on gathering information that will enable an evaluation of the bandwidth needs for Ethernet wireline applications, including, but not limited to, core networking and computing. This evaluation will then enable the generation of a white paper(s) and related presentations on the future bandwidth needs of Ethernet wireline applications, which can then be used for future reference by an appropriate related standards activity.

Proposed Deliverables

This evaluation will then enable the generation of a white paper(s) and related presentations on the future bandwidth needs of Ethernet wireline applications, which can then be used for future reference by an appropriate related standards activity.

This week

- No Meeting
- Tutorial
 - Approximately 100 people
 - http://www.ieee802.org/802_tutorials/2012-07/BWATutorial_D1_12_0716.pdf

WG Motion

- Move the following:
 - Approve and issue BWA_Report_D1p2.pdf.
 - IEEE 802.3 request the IEEE 802 EC to request ICCom to terminate the "Ethernet Wireline Bandwidth Needs" Industry Connections Activity, based upon completion of its deliverables
- Moved by John D'Ambrosia
- Second by Pete Anslow
- Technical (>=75%)
- Results 87 / 0 / 2
- Motion passes

Thank You!
