Proposed Rules Revision 3-03/07
(Align IEEE 802.3 Five Criteria requirements with LMSC P&P)

Rationale for change:

The LMSC Five Criteria are based on the 802.3 criteria, but they have minor differences. This changes mandates use of the LMSC Five Criteria with some additional unique points from the 802.3 Five Criteria being required in the responses.

Proposed change:

Replace 7.2 with the following:

1   When a study group presents a request to the WG for the WG to forward a draft
2   PAR to the LMSC EC for approval, the SG shall in addition present a completed
3   set of responses to the 'five criteria' (see LMSC P&P 17.5). An 802.3 project shall
4   also address the following:
5
6   Compatibility
7   -Compatibility with IEEE Standard 802.3
8   -Conformance with the IEEE Std 802.3
9   -Managed object definitions compatible with SNMP
10 Distinct Identity
11   -Substantially different from other 802.3 specifications/solutions.
