

<b>FEATURE</b>	<b>Importance</b>	<b>Hi</b>	<b>Med</b>	<b>Low</b>
Must be standards based				
Preservation of TR Key Attributes, larger frame size, (>1500 bytes), and Source Route Bridging support, Priority, and Availability/Robustness				
Native HSTR?				
Time to Market (Kevin - The group should set N+I May'98 for demos)				
Cost				
Scaleability				
Backbone (Initially dedicated)				
Ability to have both TR and Ethernet over same wire (not a consensus need)				
Must be able to integrate with other things				
Same wiring				
Ease of migration				
Multiple Speed NICs (4/16/100) likely to be available
