

**MARCH 2013 IEEE 802 PLENARY SESSION
TUTORIAL SCHEDULE**

SESSION WILL OCCUR MONDAY MARCH 18, 2013

Please check the current schedule (<http://802world.org/attendee>) for room information.

TUTORIAL #1 **7:30 to 9:00 PM**

LOCATION **GRAND SIERRA D**

TITLE OF TUTORIAL: **Shared 5 GHz bands update**

NAME OF PRESENTERS, THEIR AFFILIATIONS AND CONTACT INFO:

| Presenter(s) Name: | Affiliation: | Email Address: |
|---------------------------|---------------------|--|
| Peter Ecclesine | Cisco Systems | pecclesi@cisco.com |
| Peter Stanforth | SpectrumBridge | peter@spectrumbridge.com |
| Subir Das | ACS | subir@appcomsci.com |
| John Malyar | iconectiv | jmalyar@iconectiv.com |
| Stephen Rayment | Ericsson | stephen.rayment@ericsson.com |
| Mika Kasslin | Nokia | mike.kasslin@nokia.com |
| John Kenney | Toyota Research | jkenney@us.toyota-itc.com |

ABSTRACT: (a brief paragraph describing content of the presentation)

In preparation for World Radio Congress 2015 (WRC-15), regulators everywhere are looking for spectrum that can be used for mobile services. It is clear to all that clearing spectrum takes a decade or two, so sharing spectrum with incumbents is the more responsive approach. As we learned in the TV broadcast bands, some of the incumbent services are easy to detect, and some are very difficult to detect. This tutorial will review the current services, technologies and spectrum sharing possibilities in the 5 GHz bands.
