

MINUTES (Unconfirmed) IEEE 802 LMSC EXECUTIVE COMMITTEE MEETING, Revision 1

Prepared by John D'Ambrosia, Recording Secretary

Monday, July 15, 2013 – 8:00 a.m.
All times Central European Summer Time (CEST)

Geneva, Switzerland

EC members present:

Paul Nikolich –	Chair, IEEE 802 LAN/MAN Standards Committee
Pat Thaler –	Vice Chair, IEEE 802 LAN/MAN Standards Committee
James Gilb –	Vice Chair, IEEE 802 LAN/MAN Standards Committee, Chair, IEEE 802.24 Smart Grid TAG
Clint Chaplin –	Treasurer, IEEE 802 LAN/MAN Standards Committee
Jon Rosdahl –	Executive Secretary, IEEE 802 LAN/MAN Standards Committee
John D'Ambrosia –	Recording Secretary, IEEE 802 LAN/MAN Standards Committee
Tony Jeffree –	Chair, IEEE 802.1 – HILI Working Group
David Law –	Chair, IEEE 802.3 – Ethernet Working Group
Bruce Kraemer –	Chair, IEEE 802.11 – Wireless LAN Working Group
Pat Kinney	Vice Chair, IEEE 802.15 – Wireless PAN Working Group (substituting for Bob Heile)
Roger Marks –	Chair, IEEE 802.16 – Broadband Wireless Access Working Group
Mike Lynch –	Chair, IEEE 802.18 – Regulatory TAG (not present at start of meeting, arrived 8:15am)
Steve Shellhammer –	Chair, IEEE 802.19 – Wireless Coexistence Working Group
Subir Das –	Chair, IEEE 802.21 – Media Independent Handover Working Group
Apurva Mody –	Chair, IEEE 802.22 – Wireless RANs Working Group
Max Riegel-	Chair, OmniRAN EC Study Group

Nonvoting EC members present:

Geoff Thompson – Member Emeritus (nonvoting)
Canchi Radhakrishna – Chair, IEEE 802.20 – Mobile Broadband Wireless Access Working Group

EC members absent:

Bob Heile – Chair, IEEE 802.15 – Wireless PAN Working Group

Nonvoting EC members absent:

John Lemon – Chair, IEEE 802.17 – Resilient Packet Ring Working Group

3. Project Title: Local network for Computer Interconnection.	
4. Scope and Purpose of Proposed Standard: The proposed standard will apply to data processing devices which need to communicate with each other at a moderate data rate (1 # bit/sec) and within a local area (physical data path up to 4 km). The purpose of the proposed standard is to provide compatibility between devices of different manufacture so that the hardware and software customization necessary for effective data communication is minimized or eliminated.

Slides presented by Kraemer regarding Fee Waiver

SDO Fee Waiver

- IEEE SA and B02 have mutually expressed goals of increase global participation in IEEE standards development activities and to improve relationships with other international SDO's .
- IEEE SA has generally strived to conduct standards meetings in a diverse set of relevant global venues
- Encourage acceptance of IEEE standards as being international has also been associated with increasing participation in IEEE activities by other SDOs to increase awareness of the IEEE process, standards products and to decrease competitive standards developments
- In the case of ISO/IEC/JTC1 B02 has actively encouraged NBs to participate and anticipate in the B02 development process

SDO Fee Waiver

There can be several categories of SDO participants identified

- For example:
 - Officers of international SDOs
 - Officers of regional SDOs
 - Officially designated Representatives of international SDOs for instance ISO, ISO/JTC1 , ITU,....
 - Example: Chair of SC6
 - Officially designated NB Representatives who participate
 - Example: HoD for UK NB
- Individuals who participate in other SDOs
- Allow on NB rep per country

SDO Fee Waiver

Proposal

Waive 802 meeting fee requirements for

Official representatives of certain categories of SDO participants:

- Officers of international SDOs
- Officers of regional SDOs
- Officially designated Representatives of international SDOs for instance ISO, ISO/JTC1 , ITU,...
 - Example: Chair of SC6
- Officially designated NB Representatives who participate
 - Example: HoD for UK NB

- As a standard practice presume allowing (per meeting)
- Two SDO officials
- One NB rep per country

- Provide no special dispensation for individuals who participate in other SDOs

*Motion#3:	Approve fee waiver for Hans 'Rudolf-Thomann, as officially designated Swiss National Body Representative from ISO

Discussion related to Motion

Many voiced support for motion, but also noted there was further discussion regarding granting fee waivers to national body representatives, and the need to have a policy. There was some opposition based on historical precedent that fee waivers were approved on a limited specific basis. It was also noted for individuals attending based on fee waivers, that this would not grant voting rights or count towards voting rights.

Ref. 4.03 Action Item: Chair forming group to address fee waiver policy review (Gilb, Thompson, Kraemer).

4.04	II	Reminder, 802/ITU Welcome Session 11-noon, Monday	Nikolich	5	08:21 AM
------	----	---	----------	---	----------

Chair reminded of welcome session and noted that he had forwarded the presentation to the reflector.

5.00	II	BoG Update	Nikolich	2	08:26 AM
------	----	------------	----------	---	----------

Nikolich presented slides.

SA BoG Update

- Candidates for IEEE SA President for 2015-2016 term
 - Bruce Kraemer, 802.11WG Chair
 - Dennis Brophy
- Candidates for IEEE Standards Association Board of Governors Members-at-Large, 2014-2015
 - Glenn Parsons, 802.1 WG Vice Chair
 - Herb Bennett
- Election commences 15 AUG, closes 01 OCT 2013
 - Please encourage your WG/TAG participants to vote

7

Chair asked all to remind their membership about election.

Chair asked if any candidates if they wished to address individuals. Kraemer noted that not permitted to discuss candidacy in IEEE venues.. Parsons noted that it is important for all to vote.

Bob Grow noted that individuals interested in positions should make themselves known.

Gilb gave verbal update.

5.091	II	OmniRAN ECSG Update	Riegel	5	08:48 AM
-------	----	---------------------	--------	---	----------

Riegel gave verbal update.

Presentation will be given to 802.1 this week to discuss status.

Riegel noted he also felt strong link to 802.24, and will also present to all groups except 802.15, which has not been arranged yet. Kinney will take care of this.

5.10	DT	P&P update	Gilb	5	08:53 AM
------	----	------------	------	---	----------

Gilb presented the following slides.

Proposed Rule changes for July 2013

OM: Change to 5C

- Proposed changes found in ec-13-0009-07.
- Summary of changes found in ec-13-0024-03

OM: Meeting Manager Tasks

- Change: Delete Meeting Manager section from OM

Gilb to provide new proposal on meeting manager (slide) and anticipates an update to the proposal.

OM: Private Letter Ballot (1)

- Add a new subclause, 6.1.4: Private Electronic Ballot
 - The Sponsor Chair may declare that an electronic ballot is to be a private electronic ballot. A private electronic ballot shall only be held to decide items that would otherwise require an executive session. The Sponsor Chair or a Sponsor member designated by the Sponsor Chair is the ballot coordinator. The ballot coordinator shall publicly announce the private electronic ballot to the Sponsor email reflector, including, at a minimum, the following items:
 - The start and end times of the ballot and the possibility of an early close (if applicable)
 - A generic description of the action being considered
 - The members of the Sponsor who are entitled to vote
 - In addition, the ballot coordinator shall send the complete private electronic ballot announcement directly to each of the members of the Sponsor who are entitled to vote with at least the following information:
 - The full motion including mover and seconder
 - Start and end time of the ballot and the possibility of an early close (if applicable)
 - Links to the required additional information, kept in a private area, if required.

OM: Suspension of rules

- Add the following to Clause 1:
 - “Unless otherwise stated, none of the rules or requirements in this OM may be suspended by vote of the Sponsor as would otherwise be allowed by Robert’s Rules of Order Newly Revised (latest edition).”
- Add “The rules in this subclause and its subsidiary subclauses may be suspended by 2/3 vote of the Sponsor.” to the following subclauses:
 - 5.1.2 IEEE 802 LMSC plenary venue selection
 - 8.1 Procedure for coordination with other standards bodies
 - 8.2 Procedure for communication with government bodies
 - Other items to be suggested by Friday.

Reference 5.10 Action Item: 3) Nikolich to obtain a formal interpretation from IEEE Governance if 802 P&P can be "suspended", due NOV 802 plenary

OM: Private Letter Ballot (2)

- (continue new subclause, closing the ballot)
 - The Sponsor members shall only send their vote directly to the ballot coordinator. No comments shall be included in the ballot. No discussion of the motion is provided for in the private electronic ballot process. When the private electronic ballot process has completed, the ballot coordinator shall announce the result of the ballot to the Sponsor email reflector including the following:
 - The overall ballot tally (approve/disapprove/abstain/did not vote)
 - The vote of each Sponsor member
 - The Sponsor Chair shall determine which information is to be kept private consistent with the requirements for executive session.

Private letter ballot task

- Replace with offline voting with specified time period.
- Change to other descriptive adjective?
- Defer and discuss on October conference call, Geoff to propose alternative process.
- What are we trying to protect?
- Levels of confidentiality?

OM: Administrative processes

- Add a new subclause: Sponsor Administrative Policies
 - The Sponsor may hold meetings to decide administrative related issues. The following items are considered to be administrative:
 - Approval of contacts for suppliers or meeting venues.
 - Approval of expenditures
 - Except as indicated in this subclause, the same rules apply to administrative meetings as to meetings held to decide standards related issues.
 - Meetings to consider administrative issues shall be announced at least 1 week in advance.

OM: 5.3 Registration

- Change final sentence in the last paragraph as follows:
 - ~~Unless otherwise specified in WG, TAG, or ECSCG P&Ps, t~~he interpretation and implementation of the registration policy for interim sessions of IEEE 802 LMSC subgroups not hosted by the IEEE 802 LMSC shall be the responsibility of the Chair and Treasurer (if any) of the IEEE 802 LMSC subgroup(s) holding the session.

OM: Editing Guidance

- Delete the last page of the OM that begins with:
 - “Editing Guidance (not part of formal P&P or OM)”

OM: 4.1.5 Revision subclause

- Move 4.1.5, “Revision of the IEEE 802 LMSC OM and IEEE 802 LMSC WG P&P” to be the final clause of the OM

OM: ECSG Vice Chair

- Add to the end of the paragraph in OM 4.3.1:
 - “The election of an ECSG Vice Chair is subject to confirmation by the Sponsor.”

If approved, existing ECSG Vice Chair would then require confirmation. Gilb noted that endorsement and affiliation letters for confirmation would then be required.

OM: Suspension of rules

- Add the following to Clause 1:
 - “Unless otherwise stated, none of the rules or requirements in this OM may be suspended by vote of the Sponsor as would otherwise be allowed by Robert’s Rules of Order Newly Revised (latest edition).”
- Add “The rules in this subclause and its subsidiary subclauses may be suspended by 2/3 vote of the Sponsor.” to the following subclauses:
 - 5.1.2 IEEE 802 LMSC plenary venue selection
 - 8.1 Procedure for coordination with other standards bodies
 - 8.2 Procedure for communication with government bodies
 - Other items to be suggested by Friday.

Gilb then showed slides from ec-13-0009-09, however the header indicated that the document was Revision 8. Gilb corrected and uploaded Revision 10, which is show below.

July~~ne~~ 2013

Proposed 5C

ec-13-0009-~~1070~~

Background

While the 5C is used at PAR approval, it is also supposed to be reviewed and updated periodically. From the IEEE 802 LMSC Working Group Policies and Procedures:

“5.WG responsibilities

...

The WG shall periodically review and confirm that the response to the five criteria, refer to the criteria for standards development subclause in the IEEE 802 LMSC Operations Manual [4], used to approve its PAR(s) still reflect the state of the project(s) to which they relate. Should a WG need to modify the responses to the five criteria during a projects’ development in order to accurately reflect the state of the project, the modified responses shall be submitted to the Sponsor for approval.”

We currently have 5 criteria, a requirement to develop managed objects (or a plan for a project that does them) and a requirement, if necessary, to participate in the coexistence assurance (CA) document process.

The goals of the changes are:

- Maintain the value of the 5C brand (people are used to it, no need to confuse them).
- Allow 802 to create a logical separation of requirements for approving and progressing projects.
- Formalize the 5C review process and make it a part of ballot approval, in a manner similar to the PAR.
- Clearly explain the purpose and use of the CSD/5C

Hence the following changes are suggested:

- Add the managed objects requirement to the CSD reporting. Thus it will be evaluated not only at the beginning of the project, but also during its development phase (as is done with the CA document).
- The CA and managed objects are an ongoing process as opposed to criteria to be met (e.g., a bar to pass). So these are put in a separate subclause
- The 5C is a new subclause (part of the overall CSD), that now is not the “five criteria,” but rather is simply “5C” (in case we want to do more or fewer criteria in the future).

Some clause 10 rule changes will also be required.

Change subcluse 10.2 as follows:

10.2 IEEE 802 LMSC approval

A complete proposed PAR and, if applicable, the criteria for standards development (CSD) statement ~~five criteria responses to the~~, as described in Clause 14~~10.5 below~~, shall be submitted to the Sponsor via the Sponsor email reflector for review no less than 30 days prior to the day of the opening Sponsor meeting of an IEEE 802 LMSC plenary session. The submittal message should include Internet links to the required submittal documents. Presence of the submittal message in the reflector archive (with time stamp) is evidence of delivery.

Approval of the PAR by the EC is contingent on inclusion of accepted responses describing how the proposed PAR meets the ~~CSD five criteria and a work plan for the development of managed object definitions, either as part of the PAR or as a part of an additional PAR.~~ PARs which introduce no new functionality are exempt from the requirement to provide a CSD statement responses to the five Criteria. Examples of such PARs are: Protocol Implementation Conformance Statements (PICS), Managed Object Conformance Statements (MOCS), PARs to correct errors, and PARs to consolidate documents.

...

The CSD statement shall be reviewed and approved by each WG balloter, WG and the Sponsor as part of the approval process for the following:

- Forwarding the PAR to NesCom
- Forwarding the draft to Sponsor ballot
- Forwarding the draft to RevCom

A project uses the same CSD for the review process throughout the life of the project, even if the CSD is subsequently modified in the IEEE 802 LMSC Operations Manual.

CSD statements for PARs that were approved prior to July 2013 are exempt from the requirement for review prior to forwarding the draft to Sponsor ballot and forwarding the draft to RevCom.

Sponsor approval of changes to the CSD statement after its initial approval may occur either at plenary sessions or by electronic ballot, as described in 4.2.1.

Replace 10.5 Criteria for Standards Development (Five Criteria) with the following as Clause 14. No changes are shown in this version, just the new clause.

14. IEEE 802 criteria for standards development (CSD) ~~and 5C~~

The CSD documents an agreement between the WG and the Sponsor that provides a description of the project and the Sponsor's requirements more detailed than required in the PAR. The CSD consists of the project process requirements, 14.1, and the 5C requirements, 14.2.

14.1 Project process requirements

14.1.1 Managed objects

Describe the plan for developing a definition of managed objects. The plan shall specify one of the following:

- a) The definitions will be part of this project.
- b) The definitions will be part of a different project and provide details of that project.
- c) The definitions will not be developed and explain why such definitions are not needed.

14.1.2 Coexistence

A WG proposing a wireless project ~~is required to~~shall demonstrate coexistence through the preparation of a Coexistence Assurance (CA) document unless it is not applicable.

- a) Will the WG create a CA document as part of the WG balloting process? (yes/no)
- b) If not, explain why the CA document is not applicable.

14.2 5C requirements

14.2.1 Broad market potential

Each proposed IEEE 802 LMSC standard shall have broad market potential. Indicate why this project has broad market potential. At a minimum, address the following areas:

- a) Broad sets of applicability.
- b) Multiple vendors and numerous users.

14.2.2 Compatibility

All proposed IEEE 802 LMSC standards should be in conformance with IEEE Std 802, IEEE 802.1D, and IEEE 802.1Q. If any variances in conformance emerge, they shall be thoroughly disclosed and reviewed with IEEE 802.1 WG prior to submitting a PAR to the Sponsor.

- a) Will the proposed standard comply with IEEE Std 802, IEEE Std 802.1D and IEEE Std 802.1Q?
- b) If the answer to a) is no, supply the response from the IEEE 802.1 WG.

The review and response is not required if the proposed standard is an amendment or revision to an existing standard for which it has been previously determined that compliance with the above IEEE 802 standards is not possible. In this case, the CSD statement shall state that this is the case.

14.2.3 Distinct Identity

Each proposed IEEE 802 LMSC standard shall have provide evidence a distinct identity. Identify standards and standards projects with similar scopes and for each one describe why the proposed project is substantially different.

14.2.4 Technical Feasibility

Each proposed IEEE 802 LMSC standard shall provide evidence that the project is technically feasible within the time frame of the project. At a minimum, address the following items to demonstrate technical feasibility:

- a) Demonstrated system feasibility.
- b) Proven similar technology via testing, modeling, simulation, etc.

14.2.5 Economic Feasibility

Each proposed IEEE 802 LMSC standard shall provide evidence of economic feasibility. Demonstrate, as far as can reasonably be estimated, the economic feasibility of the proposed

project for its intended applications. Among the areas that may be addressed in the cost for performance analysis are the following:

- a) Balanced costs (infrastructure versus attached stations).
- b) Known cost factors.
- c) Consideration of installation costs.
- d) Other areas, as appropriate.

Discussion regarding motion presented on Slide #9

Marks suggested that the line "Use of comp rooms if available" be deleted.

Nikolich asked if there were objections to removing the line.

Law said that he was in favor if we strike the last line and change the price to be \$1500.

Rosdahl suggested the last line be put in parentheses.

Nikolich noted that Thompson was also in favor but does not get a vote.

- 4. Vendor Contract Status**

IETF Joint Meetings

From the Discussion at the Joint IETF-IEEE meeting:

1. How often to meet face-to-face?

Once a year? Once every other year?

2014 not any clear choice as both groups are firm on locations – no automatic choice

2015 – IETF is going to Dallas in March –

IEEE is going to Dallas in Nov --

The possibility move to March, and have back to back meeting in Dallas....?

Did not seem possible as IETF is meeting later in the month.

Instead we need to pick a date to have leadership meet.

Non-North American Venues

Priorities from March:

2015 March – Barcelona/Rome/Berlin

2016 March -- Macau/Shanghai/Yokahoma

2017 July – Copenhagen/Gothenberg/Vienna

2017 March – New Orleans / Florida

Even Years – Target Asia/Pacific

Odd Years – Target Europe

Intent – By March 2014 – calendar through March 2018 will be filled.

Discussion - formal plan for coming up with a committee approach towards meeting planning.

Reference #5.15 Action Item: Nikolich will need to appoint a panel (3 to 4 individuals) for the RFP for meeting manager

Reference #5.15 Action Item: Rosdahl to add hotel room rates to his future venue spreadsheet, due OCT EC telecom

It was noted that adding information regarding hotel room rates would be helpful.

5.18 II Geneva 2013 Expectation

What to expect?

Mainly it will be the same as any other Plenary

What is Different?

1. No common hotel
2. Meeting rooms are in more than one building
3. Breaks on own – cafeteria are located in each building
4. Some rooms are not available in the evening
5. Some room configurations will be different (open square)
6. No organized Social
7. Opening Plenary – 11-12am

Geneva Expectations (cont)

Monday, Tuesday, Wednesday and Thursday :

Meetings in CICG and CCV must end before 6:30pm (18:30)

Please leave buildings promptly.

***All Evening Meetings (PM3) after 6pm must be held in ITU.**

Note: that Power to ITU meeting rooms will be out from 9pm Tues until 6am Wed.

Friday :

***All Meetings are to be held in ITU.**

Gilb inquired if EC would go into Exec Session to discuss "GetIEEE 802" Agreement

Reference #5.231 Action Item: Nikolich to conduct EC Exec Session meeting to discuss/finalize getIEEE 802 agreement, scheduled for noon-1pm 01OCT2013 prior to EC interim telecon meeting.

McCabe presented slides (<https://mentor.ieee.org/802-ec/dcn/13/ec-13-0045-00-00SA-tech-governance-overview.ppt>)

IEEE Technology Governance

Technology governance occurs at the intersection of technology and policy

Technology governance is an aspect of public policy going beyond governmental intervention and regulation

Technology impacts policy and policy impacts technology and innovation

IEEE Technology Governance

New activity as the IEEE

- In early stages of development

- Cross functional activity

Spearheaded by the IEEE-SA

IEEE Technology Governance

IEEE has a strong presence and reputation in the technology arena

It is directly and indirectly affected by discussions, topics and controversies

We are committed to providing an environment where the expertise and strength of our diverse global community can help inform and influence discussions around technology governance in a "bottom up," open and transparent process

We seek to optimize our global, multi-stakeholder constituency's technical expertise and knowledge to engage with and make contributions to venues and fora, helping to advance technology for the benefit of humanity

Technology governance activity seeks to unite IEEE communities around common issues and concerns

We seek to structure and coordinate our resources, leverage our potential and capabilities, and project them strategically into the technology governance arena, increasing our global footprint and reputation

Technology Governance

Coordinate the IEEE community's input on policies and policy related topics

Support the IEEE community's development of consensus policies and guidelines that help promote and advance the market driven, "bottoms-up" standards paradigm

Support the IEEE community by:

- Managing the technology governance process efficiently and effectively to benefit the global IEEE community

- Engaging and supporting the participation of all stakeholders

- Informing and educating stakeholders
