## **IEEE 802 LAN/MAN Standards Committee**

**Paul Nikolich** 

Chair, IEEE 802 LMSC 18 Bishops Lane Lynnfield, MA 01940 cell: 857.205.0050 p.nikolich@ieee.org

To: Theresa Steenweg CC: 802 SEC

**SUBJECT:** Endorsement of Carl Stevenson for

**IEEE-SA International Award** 

**DATE:** March 21, 2003

On behalf of the Executive Committee of IEEE 802, I strongly support the nomination of Carl Stevenson for the IEEE-SA International Award.

Since its inception in March 2002, Carl has been the Chairman of the 802.19 Technical Advisory Group on Radio Regulations. This group performs a vital function for all of 802's wireless groups as it is charted to coordinate and prepare all internal and external communications with respect to radio regulations.

Carl has demonstrated a high level of skill and proficiency in leading the 802.19 TAG. He quickly established the policy and procedures for the LAN/MAN Standards Committee (LMSC) in the radio regulatory area and immediately led the group in acting on many US FCC proceedings both for domestic rules as well as those proceedings important to the global harmonization of the radio spectrum critical for the family of IEEE 802 radio standards.

With Carl's involvement, 802 and the industry will be well represented and well prepared for the start of the World Radio Conference 2003 (June-July 2003 in Geneva).
