Q.5/13 would like to thank IEEE 802.1 for your liaison statement on various 802.1ag and Y.17ethoam issues. This communication has been considered during a meeting of Q.5/13 from the 16<sup>th</sup> to the 25<sup>th</sup> of January, in Geneva.

Draft new Recommendation Y.1731 "OAM mechanisms for Ethernet based networks" (ex Y.17ethoam) has been finalized by Q.5/13 during the meeting. The document was then consented by ITU-T SG 13.

In the next weeks, Y.1731 will be submitted to a 4 week approval period, when ITU-T Member States and Sector Members will have the opportunity to make comments on the content of the draft.

The next meeting of Q.5/13 is planned to be held in Kobe (Japan) from the 22<sup>nd</sup> to the 27<sup>th</sup> of April 2006.

Please continue to keep us aware of the development of your Ethernet OAM related standards.

**Attachment:** Text of draft new Recommendation Y.1731 – (Ref. TD 153 (PLEN)) is available at: <http://www.itu.int/ITU-T/studygroups/com13/sg13-sdo-ftp.html>
