

T11 Liaison Report to IEEE 802.1

Claudio DeSanti, March 2008

T11 Activities Relevant to IEEE 802.1

- FCoE (Fibre Channel over Ethernet)
 - Defined frame format, model, terminology, discovery, addressing
 - Refining the last details
- Requires “Lossless Ethernet”
 - Data Center Bridging capabilities
- Expectations from IEEE 802.1:
 - 802.1Qau Congestion Notification
 - 802.1Qaz Enhanced Transmission Selection
 - 802.1Qbb Priority-based Flow Control
- Considering to define an FCoE version of Priority-based Flow Control if IEEE 802.1 decides to not pursue it

Additional Information

- Next T11 Plenary meeting:
 - April 14 to 18 in New Orleans, LA
- For more details on the T11 activities please look at:
