Disapprove	1
Abstain	26
Total	29
Commenters	2

Comments Submitted

	Required	Not Required	Total
Technical	9	1	10
Editorial	16	3	19
Total	25	4	29

Going Forward

- Expect to issue D1.0 in time for completion of working group ballot before November meeting;

- D1.0 will reflect comments made against D0.4 but should otherwise be unchanged;

Comment Review Plan

- Commenters (and others) will have had opportunity to review proposed remedies before review session;
- It is proposed that all comments be accepted except for comment 4 which is either accepted or accepted in principle;
    - Commenter and editor to discuss; unlikely this needs WG discussion;
- Comments are related to editorial and technical errors rather than concepts or issues;
- Unless there are requests to discuss particular comments, the editor does not plan to discuss individual comments.
    - could change if late comments are received;

Comment Summary

- Clause 12 clarification that candidate protection segments are specified by priority;

- Suggestions to improve newly added figure 8-8; and to move IPS Control outside (above) the MAC Relay entity

- Improvements/corrections to state machines;

- Corrections to wording, references, figure numbers, etc.
