

DCB status

7 July 2012

Pat Thaler

IEEE Std 802.1Qbg and IEEE Std 802.1BR

- Published!
- Congratulations and thanks to all who participated

This meeting

- New work proposals

- Scaling edge bridge address tables

- <http://www.ieee802.org/1/files/public/docs2012/new-dcb-arad-scaling-edge-bridge-address-table-0512.pps>

- FCoE LLDP TLV

Network Virtualization Overlay

- IETF WG chartered in March
 - Chartered to write problem statement, requirements and gap analysis documents
 - Timeline to complete April 2013
 - Then will consider chartering solutions
 - 802.1Qbg VDP is very close to the described requirement for a VN (virtual network) attach/detach protocol
 - Might be useful to define additional filter info formats for the VDP association TLV
 - There was interest in pursuing this if IETF charters NVO work.

IETF IEEE 802 leadership meeting

- Meeting between IEEE 802 EC and IETF IAB and IETF IESG
- Discuss how to improve collaboration
- 30,000 foot discussion
 - Not getting into the details of the issues
 - Focused on methods to use to improve interaction
- Pat Thaler compiling a list of areas where collaboration is desired
