

IEEE1 904.3 TF Radio over Ethernet update

Jouni Korhonen

IEEE 802.1TSN @Pittsburgh 2015

Disclaimer

- This is not an official IEEE 1904 WG output; just an informal update what is happening regarding Radio over Ethernet in IEEE 1904.3.

Progress since Berlin update

- Second f2f held in April. 2015.
 - Spec skeleton formed.
 - Timeline formalized.
- Reoccurring telcos every two weeks:
 - Encapsulation header stabilizing.
 - Control channel starting to form.
 - Strawman proposals for both structure aware and agnostic CPRI mappers.
- Next meeting first week of June, in Beijing.
 - Preceding the CMRI NGFI workshop.

Q & A
