

Title: Liaison response to ITU-T SG15-LS68
From: IEEE 802.1
For: Information
Contact: Glenn Parsons, Chair, IEEE 802.1, glenn.parsons@ericsson.com
To: ITU-T SG15 Q14 (tsbsg15@itu.int)
Date: November 10, 2017

Dear Colleagues,

Thank you for the information communicated in your liaison statement 68 (“LS/r Regarding coordination on IM/DM for OAM (reply to IEEE802.1-LS36 - TD122/3)”).

As yet another step in coordinating the development of YANG models for Ethernet OAM per our previous agreement, we look forward to meeting jointly during the workshop between IEEE 802.1/802.3 and ITU-T SG15 to be held Saturday January 27, 2018 (as a follow up to our next meeting in Geneva the same week where there will be various YANG topics discussed). We also anticipate that a number of IEEE 802.1 participants interested in YANG work will attend the Q14/15 interim meeting you are planning to hold Sunday January 28, 2018.

We would like to note that IEEE 802 has a YANG interest group called YANGsters set up for discussions (website: <http://1.ieee802.org/yangsters/>, mailing list: STDS-802-YANG@listserv.ieee.org, conference calls: 6:00AM PDT the last Wednesday of the month at <https://join.me/ieee802.1>). We would encourage your participation in those discussions.

Best regards,
Glenn Parsons
Chair, IEEE 802.1 WG
