P802.1QCBdb Extended Stream Identification Functions

Resolution of Comments on Project Authorization Request (PAR) and Criteria for Standards. Development (CSD)
802.11 Comment on PAR 5.2b

Comment:
PAR 5.2.b: the PAR should be in present tense and describe the amendment scope. Delete the second sentence Suggest change to first sentence: “This amendment specifies procedures and managed objects that add new stream identification functions.”

Proposed response:
Accept

- 5.2b scope modified as proposed: “This amendment specifies procedures and managed objects that add new stream identification functions.”
