Date: November 15, 2018

Dear Mr. Hahn and colleagues,

We thank LNI4.0 and Dr. Karl Weber for the presentation of your liaison and your interest in our work. We have reviewed your request for information and are providing the latest revision of the following draft specifications:

- IEEE P802.1AS-Rev
- IEEE P802.1Qcr
- IEEE P802.1CS
- IEEE P802.1ABcu
- IEEE P802.1Qcw

The IEC/IEEE 60802, P802.1CBcv, P802.1CBdb, P802.1Qdd, and P802.1CQ projects are at an early stage and drafts are not yet available for distribution.

We request that these drafts be stored for LNI4.0 use with password-protected access. We also request that you provide access to the documents and draft documents of LNI4.0 referring to IEEE 802.1 specifications or draft specifications.

Please note that the IEEE 802.1 Working Group is open to anyone and is based on individual participation. As a result, it is problematic to identify official liaison representatives from other organizations. We hope that we can continue to cooperate, both by liaison messages and by common participation in the two organizations.

IEEE 802.1 meets again 14-18 January 2019 in Hiroshima, Japan and 11-15 March 2019 in Vancouver, BC, Canada. IEEE 802.1 face-to-face meeting details are available at: <http://www.ieee802.org/1/meetings>.

Best regards,
Glenn Parsons
Chair, IEEE 802.1 WG
