Date: July 12, 2018

Dear Colleagues,

Thank you for your interest in our ongoing work expressed in your liaison letter: <http://www.ieee802.org/1/files/public/docs2018/liaison-OPCF-liaison-and-drafts-0718-v01.pdf>. We are interested in establishing collaboration between our organizations.

IEEE-SA is working on the process for sharing drafts. We are not able to share drafts until this process is completed. After this process is completed, we would request draft OPC Foundation specifications specifically referring to IEEE 802.1 specifications and drafts.

Please note that the IEEE 802.1 WG is open to anyone and is based on individual participation. As a result, it is problematic to identify official liaison representatives from other organizations. We hope that we can continue to cooperate, both by liaison messages and by common participation in the two organizations. We encourage participants interested in the development of the relevant standards to participate both groups and to contribute to IEEE 802.1.

Sincerely,
John Messenger
Acting Chair, Vice-Chair, IEEE 802.1 WG
