P802.1DG/D1.1 Summary

The Editor's main purpose for D1.1 was to evaluate the value of some informative tutorial content and to set the future direction for the project. Comments received have been extremely helpful in reaching this goal. THANKS TO ALL WHO SUBMITTED COMMENTS!

This document sorts comments into discussion topics for ease of comment resolution. The Editor has made a best effort to organize the comments by CommentType (E, ER, T, TR, etc). In case of errors, the comment resolution database is the definitive source.

In those places where comments are grouped together (i.e. enclosed in []), they have been put into the category that is the best fit for that group.

Since this is a Task Group ballot the Editor has occasionally taken the liberty of providing a "Response" that points to another comment's Response.

Reorganization

The tutorial information in clause 6.2 and associated subclauses is informative in nature and will be moved to an Informative Annex.

- There is information in these tutorials that may not make it into a profile, but is still valuable for those IVN designers who may wish to go beyond the profiles we define
- Therefore, the information should be kept but not in the core of the document
- Profiles will reference the tutorial information when a detailed explanation is needed
- Several profiles may point to the same informative details
