Dear Colleagues,

The IEEE 802.1 Working Group would like to inform you that the IEEE P802.1CQ project, “(Draft) Standard for Local and Metropolitan Area Networks: Multicast and Local Address Assignment,” has initiated a Task Group ballot on draft 0.8.

We have learned, through the IETF/IEEE 802 Coordination process, that the IETF Internet Area Working Group has an interest in P802.1CQ <<https://1.ieee802.org/tsn/802-1cq/>>. We welcome your review of and comments on the draft standard. We will send you details on how to access the draft so you can provide access to those interested in participating in the review. We will also provide instructions for submitting ballot comments. Ballot comment resolution will be conducted during one or more of the electronic meetings of the TSN Task Group.

Note that the IEEE 802 work is open and contribution driven. Participation is on an individual basis and technical discussion can be conducted based on individual contributions. The TSN Task Group holds regular electronic meetings: details are available at <https://1.ieee802.org/wg-calendar>.

Respectfully submitted,
Glenn Parsons
Chair, IEEE 802.1 Working Group
