Keywords: IEEE 802.1D, IEEE 802.1Q;

Abstract: ITU-T Study Group 2 replies to IEEE 802.1 on the withdrawal of IEEE Std 802.1D-2004. For the Q series of ITU-T Recommendations, updates will be provided to replace the reference from IEEE Std 802.1D-2004 to IEEE Std 802.1Q-2018; for the E series of ITU-T Recommendations, more time is needed for making decisions.

ITU-T Study Group 2 thanks IEEE 802.1 for informing us about the plan to withdraw IEEE Std 802.1D-2004 at the end of 2021, and the functionality of 802.1D is maintained in IEEE 802.1Q. We have checked the Q series of ITU-T Recommendations that have references to IEEE Std. 802.1D, and the following conclusion is reached: for Recommendations ITU-T Q.834.1, Q.834.4, and Q.838.1, we will provide amendments to update the references from IEEE 802.1D (2004) to IEEE 802.1Q (2018).

In addition, the impact of changing the reference from IEEE 802.1D-2004 to IEEE 802.1Q-2018 will be further considered in relation to the E series of Recommendations that were identified (ITU-T E.351, ITU-T E.352, ITU-T E.360.1).
