Dear Colleagues,

The IEEE 802.1 Working Group would like to thank the EtherCAT Technology Group for the information provided in [liaison statement](#) on draft sharing between IEEE 802.1 WG and EtherCAT.

We thank for your interest in our technology and documents. Please find attached the requested IEEE P802.1Qdd D0.5. Please note that IEC/IEEE 60802 (65C/1116/CD) draft specification is available to you on the IEC document storage for download based on the established liaison between EtherCAT Technology Group and IEC SC65C/WG18.

As part of draft exchange between our organizations, we would like to ask you to share the most recent revision of the EtherCAT TSN profile with us.

Note that the IEEE 802 work is open and contribution driven. Participation is on an individual basis and technical discussion can be conducted based on individual contributions. The TSN Task Group holds regular electronic meetings: details are available at <https://1.ieee802.org/wg-calendar>.

Respectfully submitted,  
Glenn Parsons  
Chair, IEEE 802.1 Working Group
