**Early identification of holders of potential
Essential Patent Claims is encouraged**

Ways to inform IEEE

- Cause an LOA to be submitted to the IEEE-SA (patcom@ieee.org); or
- Provide the chair of this group with the identity of the holder(s) of any and all such claims as soon as possible; or
- **Speak up now and respond to this Call for Potentially Essential Patents**

If anyone in this meeting is personally aware of the holder of any patent claims that are potentially essential to implementation of the proposed standard(s) under consideration by this group and that are not already the subject of an Accepted Letter of Assurance, please respond at this time by providing relevant information to the WG Chair

PAR Comment Response

Greetings,

The 802.11 PAR Review SC met and has the following comments for 802.1ASdr:

PAR

8.1 – instructions indicate that the section number is to be indicated.

Add headings. The titles for the standards referenced are as follows:

8.1 The footnote that is indicated is confusing. If the footnote should be included In the PAR? Is the footnote for the title or the sentence?

The footnote confusion is an artifact of the myProject system and has since been fixed. The text [NOTE: the “.1” following “IEEE Std 802.1Q(TM)-2018” marks the start of a footnote.] has been deleted.

5.5 The first use of PTP should be spelled out for the acronym (not just in 8.1).

Spell out the acronym PTP at first use and delete the list of acronyms in 8.1.

CSD

1.2.1 g) Is this a true statement “ This project avoids non-inclusive, insensitive...”, or are you really “This project modifies some existing terms in the existing standard....”

Change the sentence to, “This project replaces existing non-inclusive, insensitive, and other deprecated terminology in the existing standard to further enable market adoption, conformity assessment, interoperability, and other technical aspirations of the existing standard”

NEScom Comments

- In 8.1, change “IEEE Std 1588-2019, IEEE Standard for a Precision Clock Synchronization Protocol for Network Measurement and Control Systems” to “IEEE Std 1588-2019, IEEE Standard for a Precision Clock Synchronization Protocol for Networked Measurement and Control Systems”

The related resolution of IEEE SASB in December 2020 excludes also insensitive terminology as well as deprecated terminology. This should be reflected in the scope of the PAR.

This amendment changes the non-inclusive, insensitive, and deprecated terminology including those identified by IEEE P1588g and IEEE editorial staff, replacing them with their suitable terminology wherever possible.

In 5.5, I suggest removing "such as "master" and "slave"" from the PAR.

IEEE Std 802.1AS-2020, as a profile of IEEE Std 1588-2019, uses non-inclusive terms to describe port states and clock roles in a Precision Time Protocol (PTP) network.
