ISO/IEC JTC1 SC6 STATUS

March 2023

ISO/IEC JTC1 SC6 Status

- PSDO agreement in place to allow progress of IEEE standards in ISO/IEC
- EC JTC1 standing committee is administering the process for IEEE 802 Standards
 - 802.1, 802.3, 802.11, 802.15, 802.16, 802.21, 802.22
- IEEE 802.1 has previously agreed to submit its standards to SC6
 - Most standards and their amendments (note – not sending Recommended Practices)
 - Motion required per standard
 - To forward IEEE SA Ballot draft for information and comment
 - To submit approved standard for PSDO approval
 - Procedure for Corrigenda: one 90 day ballot and three questions.

IPR related comments & ongoing discussions

(info from JTC1 IEEE 802 SC meeting)

- IEEE 802.11ax 60-day ballot passed on 10 Aug 2021 with usual negative comments and a new comment (with positive vote) from Japan (in relation to negative LoAs)
 - A response was sent – awaiting resolution
 - Then 802.11ay 60-day ballot failed on 9 Oct 2021
 - Failed 6/6/7 with three blanket negative LOAs and one explicit negative LOA comment
 - The failure means the process will need to restart after the IPR issue is sorted. At this time, these documents and other IEEE 802.11 standards documents are on hold.
- Ultimately the IEEE SA directed IEEE 802 that:
 - The IEEE SA President would respond to ISO on the IPR related issues, based on content that had been developed by IEEE 802 (see [11-21-1400-05](#))
 - This approach had a number of benefits:
 - It avoided the IEEE 802 EC arguing about whether it should respond to the non-technical IPR related comments
 - It highlighted the importance of the issue to IEEE SA
- January 2023: Discussions between various stakeholders over the last year or so ... with limited progress so far. It is now understood that the 802.11ax IPR related issue is still being discussed ... and so hopefully good news can be reported in the future
- There's a new contribution from WG1 convenor that proposes to suspend the fast track adoption process until the issues are resolved. This issue has been discussed and is being considered at the ISO/IEC JTC1 and above levels.
