IEEE 802.1 Plenary – November 2023

SECURE CONNECTIONS  
FOR A SMARTER WORLD

PUBLIC

# History

- In Sep 2023's Interim meeting a presentation was given stating that 802.1 needs to support our TSN User's needs by addressing their concerns with 802.1AS's Announce message
  - <https://www.ieee802.org/1/files/public/docs2023/as-pannell-Supporting-Our-Customers-0923-v02.pdf>
- Where a new managed object was proposed to disable sending Announce messages
  - Such that when Announce messages are sent, IEEE 802.1AS remains compatible with IEEE 1588

## History (2)

- The “feeling of the room” at the Sep 2023’s Interim meeting meeting was in strong support to address these concerns
- Thus, a motion to start the PAR & CSD work is Jan 2024 is being put forth at this Nov 2023 Plenary meeting

# Proposed Motion

- 802.1 authorizes the TSN TG to generate PAR and CSD at the January 2024 interim session for pre-circulation to the EC for an amendment to IEEE 802.1AS on Configurations for the Announce Message.
- Proposed: Don Pannell
- Second:
- In the WG (y/n/a):

# Final Motion Text (work area until final)

- 802.1 authorizes the TSN TG to generate PAR and CSD at the January 2024 interim session for pre-circulation to the EC for an amendment to IEEE 802.1AS on Configurations for the Announce Message.
- Proposed: Don Pannell
- Second:
- In the WG (y/n/a):
