5.2 Scope of proposed standard: This standard specifies Bridges that interconnect individual LANs, each supporting the IEEE 802 MAC Service using a different or identical media access control method, to provide Bridged Networks and VLANs.

5.3 Is the completion of this standard contingent upon the completion of another standard? Yes

Explanation: This is a maintenance roll-up of IEEE Std 802.1Q-2022 with the amendment of IEEE Std 802.1Qcz. Depending on their progress to approval, P802.1Qcw, P802.1Qcj, or other amendments in progress may also be included.
