

Brainstorming on IEC/IEEE 60802 Edition 2:

Review of potential security use cases for a potential amendment to IEC/IEEE 60802

David McCall (Intel Corporation)

Dieter Proell (Siemens AG)

Use Case Num	Use Case Name	Requirement Num	Requirement	Met in 60802 ?	Notes
1	Checking the equipment under control				
2	Imprinting during bootstrapping/commissioning				
3	Instructing equipment about security				
4	Peer entity authentication				
5	Message exchange protection				
6	Proving self-asserted information				
7	Resource access authorization				
8	Credential/key update during operation				
9	Credential/key revocation/invalidation during operation				

Use Case Num	Use Case Name	Requirement Num	Requirement	Met in 60802 ?	Notes
10	Crypto algorithm-expiry/agility				
11	Robust supply of security core function				

Questions, Discussion, ...
