

**Other considerations  
for  
IEC/IEEE 60802, Edition 2**

**IEEE 802.1 Interim Meeting  
May 2025**

**Jordon Woods, Self-affiliated**

# Introduction

- Several topics for IEC/IEEE 60802, edition 2 have already been raised.
  - Improved security
    - European Cyber Resilience Act (CRA)
    - ISA/IEC 62443  
(<https://www.ieee802.org/1/files/public/docs2025/60802-Proell-BrainstormingED2-Cybersecurity-0525-v01.pdf>)
  - Wireless communication/Management.
  - Multiple Configuration Domains
  - P802.1DU: Cut-Through Forwarding

# Other Topics

- However, some topics that have been discussed in the past have not been captured.
- Note: this contributor is not advocating “for” or “against” including these topics. They are offered in the spirit of brainstorming.
  - Securing Time
  - Relaxed normative requirements for the Global Time domain
  - P802.1DD: Resource Allocation Protocol
  - Full PSFP functionality
  - FRER for bridges
  - MAC/PHY recommended delays for IACS
  - DHCP/IP assignment
  - Additional development of the management proxy concept

**Thank you**
