

P802.1DD Architecture Overview

Martin Mittelberger

Siemens AG

2025-09-17

v01

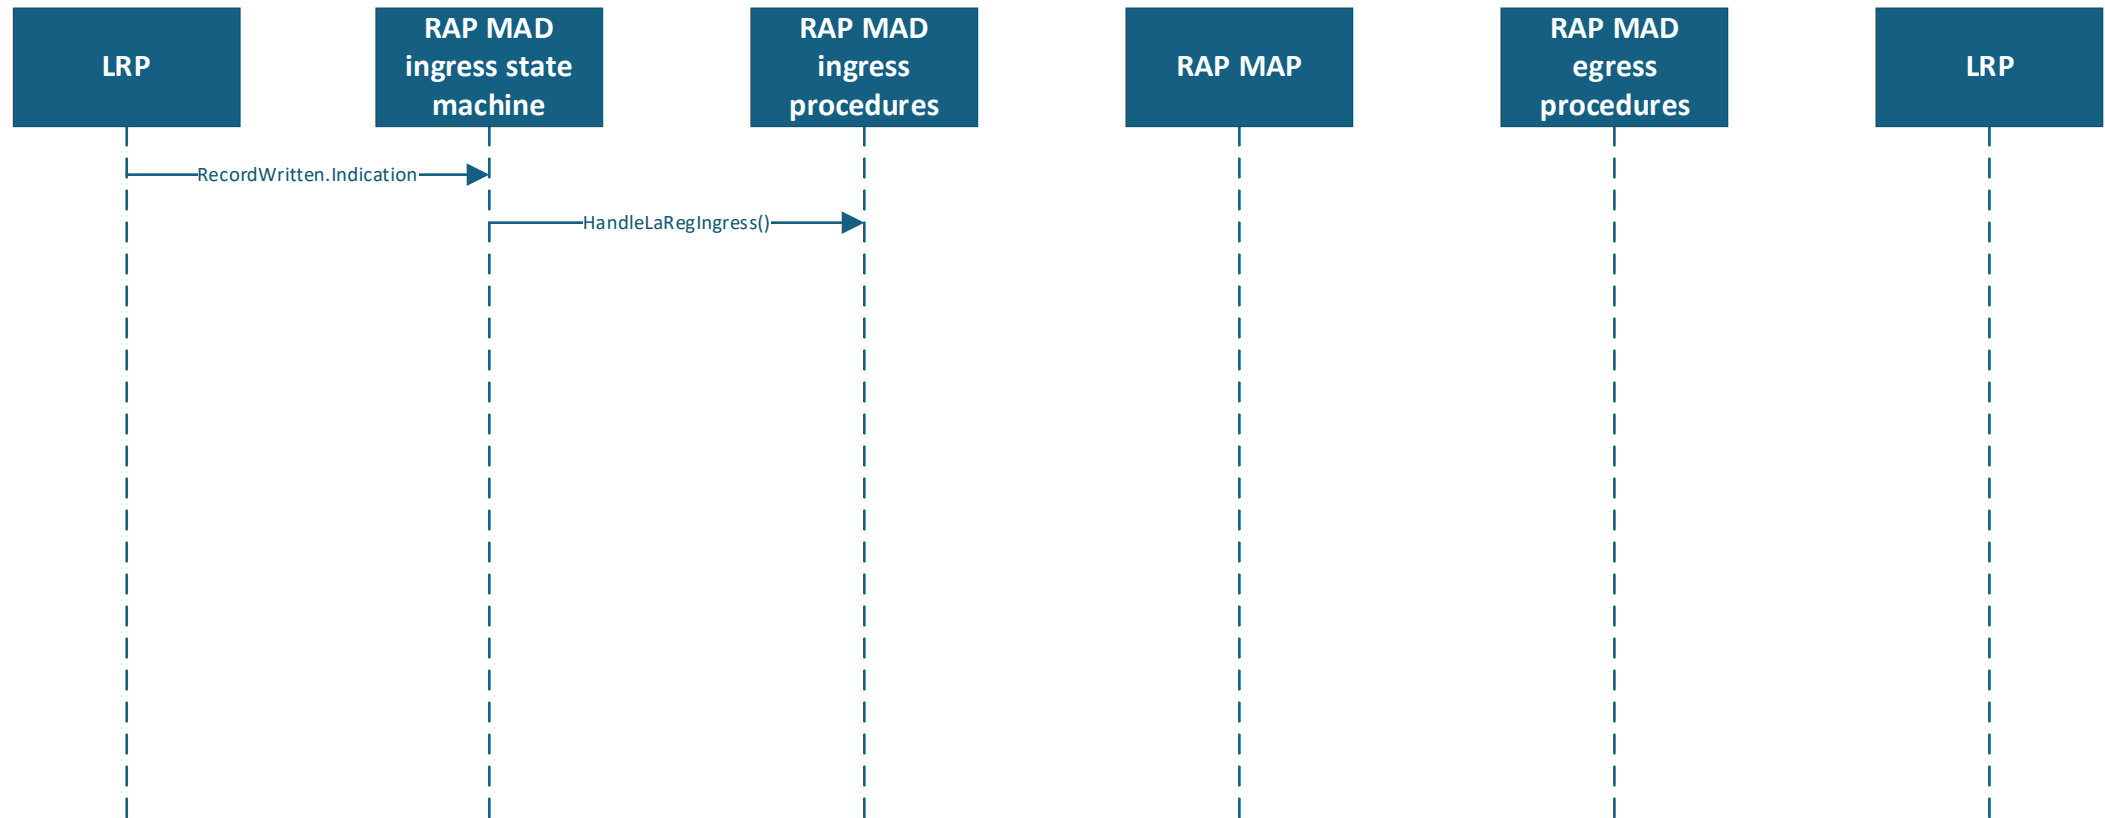

Status of current draft d1.3

In D1.3 the new architecture was updated throughout clause 6. All other parts remained mainly unchanged with regard to the technical changes in architecture and will be adapted after there is consensus about clause 6.

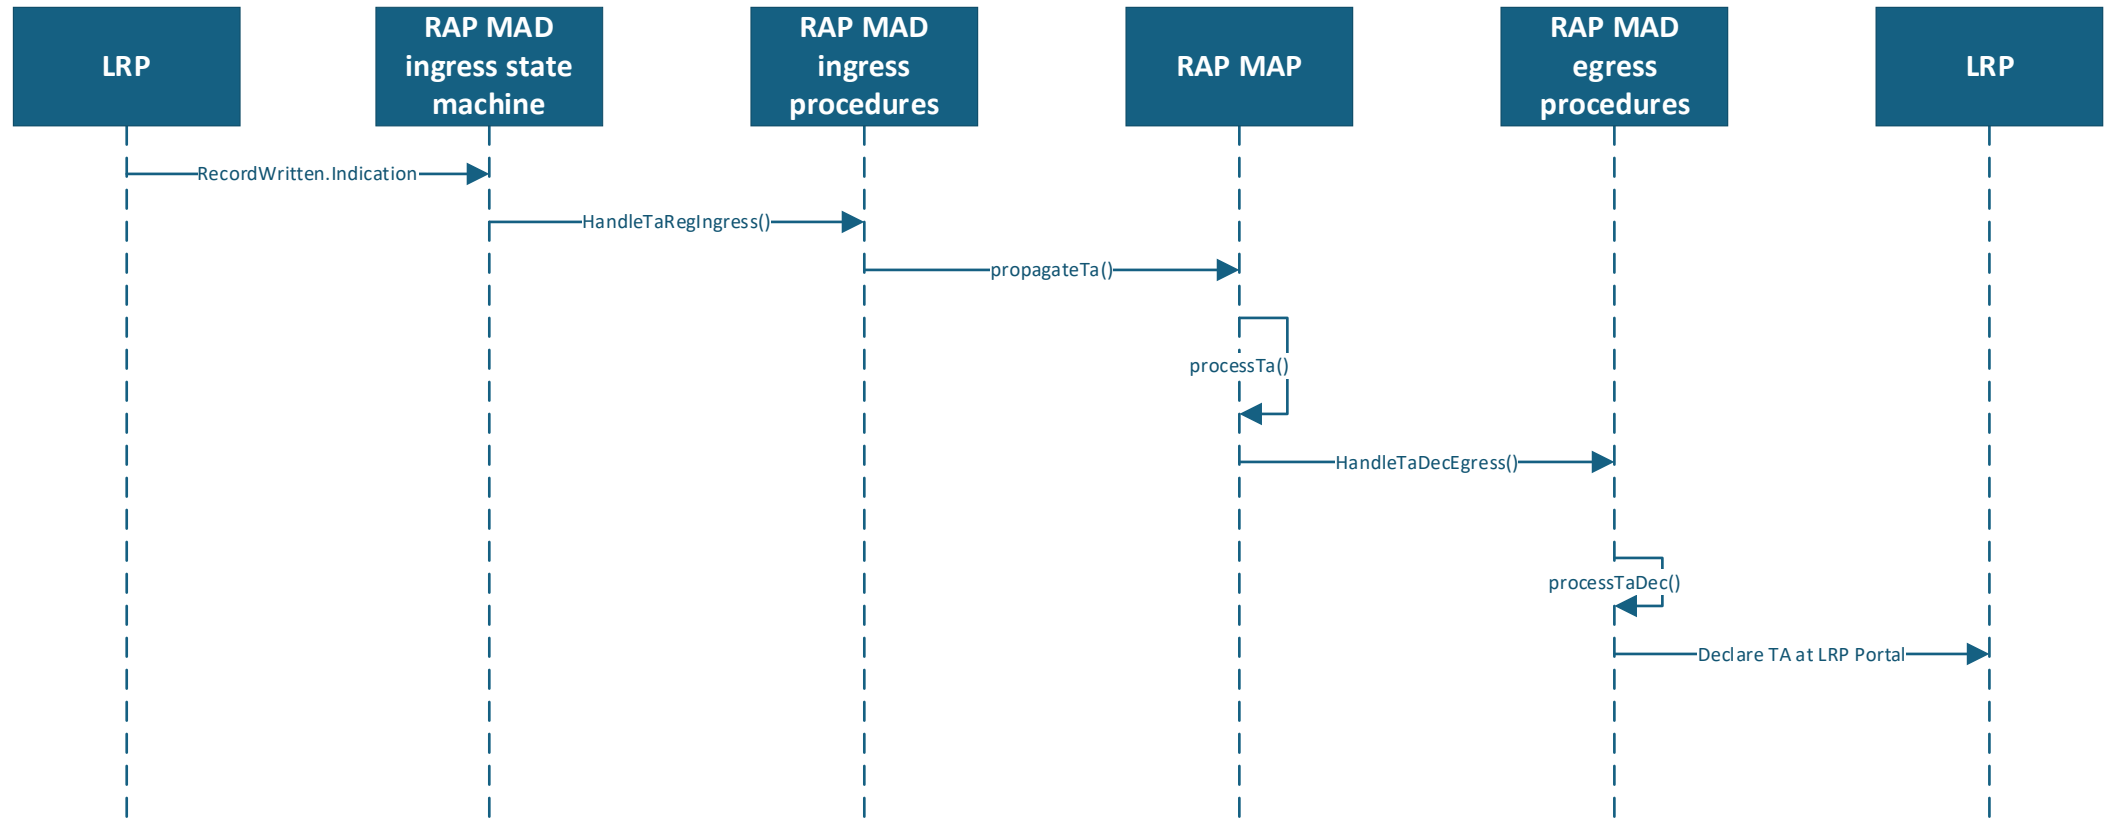

The draft is still not completely consistent and is intended for further discussions before starting TG ballot.
