Comments on P802.11bu PAR & CSD

From IEEE 802.1

IEEE 802.1 Working Group Chair: Glenn Parsons

IEEE 802.1 Maintenance Task Group Chair: Mark Hantel

- These comments are on the PAR and CSD found in:
  - https://mentor.ieee.org/802.11/dcn/26/11-26-1477-00-0aio-draft-p802-11bu-par.pdf
  - https://mentor.ieee.org/802.11/dcn/26/11-26-0979-07-0aio-initial-csd-discussion.docx

PAR

- 2.1 Project Title:
  - LAN is not spelled out on first use.
  - AI is not spelled out on first use.
- 5.2.b Project Scope
  - AP is not spelled out on first use.
  - MAC service interface to make requests by layers above the MAC is defined in IEEE Std 802.1AC. Is an amendment to IEEE Std 802.1AC-2026 also planned to be started to define the MAC service interface for 802.11bu? Please clarify.
- 5.5 Need for Project
  - WLAN is not spelled out on first use.

CSD

- 1.2.1 Broad Market Potential
  - The PAR alludes to stations that are moving. The CSD alludes to APs that are mobile. Suggest using consistent terms regarding moving/mobile or removing the note.
  - 802.1 applauds the depth of information in the broad sets of applicability. Suggest highlighting broad sets of applicability instead of comprehensive sets of applicability.
  - There is a double period in the note after reference [1].
  - This technology sounds like it could be applicable to more networks than just WLAN. Is this really a 802.11 project? What are the novel elements that tie this to WLAN?
