-----------------	---	--

The ITU-T Joint Coordination Activity for IMT-2020 and IMT-2030 (JCA-IMT2020/IMT2030) thanks all that have replied to previous requests for input on IMT-2020 and beyond related standardization work. The current online version of the roadmap is available from the [JCA-IMT2020/IMT2030 website](#).

In alignment with the new Terms of Reference of this JCA, the updated objective of the roadmap is to support non-radio aspects of IMT-2020/IMT-2030 standardization and pre-standardization coordination. IMT-2020 and IMT-2030 are the important topics for our industry, and many standardization-related activities are held in various entities.

JCA-IMT2020/IMT2030 will keep updating this roadmap, and therefore we solicit your information about updates. If you send us the latest information of your activity related to IMT-2020 and IMT-2030 as well as Network Function Virtualization (NFV), programmable networks, self-managed networks, autonomous network, slicing (including orchestration and capability exposure), fixed-mobile and satellite convergence (FMSC) and Information-Centric Networking (ICN), digital twin network, AI/machine learning and other activities that are strongly related to IMT-2020 and IMT-2030, we will reflect it in the next roadmap update, which will be performed online soon after the next JCA-IMT2020/IMT2030 meeting.

Please submit your updates using the template to be found in appendix below. In the last column of this template we expect to get a direct pointer to your document and not to the website where one needs to search for your document. Should you wish to communicate any additional information

about your specifications and projects, we invite you to do so. If you have a representative that wishes to present at an upcoming JCA-IMT2020/IMT2030 meeting, please let us know.

In addition, if not done yet, we invite the ITU-T Study Groups, SDOs, fora to nominate a representative to this group.

JCA-IMT2020/IMT-2030 anticipates having its next meeting on 24 June 2026, 13:00 - 14:30, alongside the ITU-T SG13 meeting (23 June – 2 July 2026) in Geneva. We invite your inputs/updates to the roadmap and your presentations on your latest IMT-2020/IMT-2030 progress.

Appendix – template to provide information on IMT-2020 and IMT-2030 related activities

Activity domain	Entity	Title of deliverable	Scope of deliverable	Current status	Reference/URI
IMT-2020 and IMT-2030 5G Network Slicing ICN FMSC	SDO, and WG, if possible	Name acronym 	This document aims to ...	Draft ITU-T Recommendation International Standard Specification	www....
