| IEEE 802.1 REVISION REQUEST 0036 |

DATE: June 29, 2012
NAME: Weiying Cheng
COMPANY/AFFILIATION: Tellabs
E-MAIL: Weiying.Cheng@tellabs.com

REQUESTED REVISION:
STANDARD: 802.1Q-2011
CLAUSE NUMBER: Clause 20.9.1 or MIB file on pp668
CLAUSE TITLE: MEPActive

RATIONALE FOR REVISION:

Here is the description of Clause 20.9.1 (MEPActive):
"Administrative state of the MEP A Boolean indicating the administrative state of the MEP.
True indicates that the MEP is to function normally, and false that it is to cease functioning"

From the first two statements of the above description, this object performs the role of an

administrative state.

However, from the last two statements, it looks like this MIB object performs the function of an operational state.

PROPOSED REVISION TEXT:

"Administrative state of the MEP A Boolean indicating the administrative state of the MEP.
True indicates that the MEP function is enabled administratively and false indicates that the MEP function is disabled administratively"

IMPACT ON EXISTING NETWORKS:

None
