REQUESTED REVISION:  
STANDARD: 802.1AS-2011  
CLAUSE NUMBER: 10.3.11.3  
CLAUSE TITLE:

RATIONALE FOR REVISION:

Figure 10-13: State DISABLED sets announceReceiptTimeoutTime to currentTime.  
This ensures that 14.7.10 announceReceiptTimeoutCount will increment when  
AGED is entered from DISABLED. Should there be a qualification on the  
counter to only count when entering from CURRENT? Or maybe DISABLED should  
set announceReceiptTimeoutTime to currentTime plus  
announceReceiptTimeoutInterval?

PROPOSED REVISION TEXT:

See Above

IMPACT ON EXISTING NETWORKS:

None. Changes could help implementers avoid confusion.
