- Introduced the agendas on slide 3 that were approved.
- Presented slides 4 through 8 (reproducing slides 0 through 4 of the IEEE-SA PatCom Patent Slides for Standards Development Meetings, separately available at <http://standards.ieee.org/about/sasb/patcom/materials.html>).

Additionally, neither IEEE, the WG, nor the WG Chair can ensure the accuracy or completeness of any assurance or whether any such assurance is, in fact, of a Patent Claim that is essential for the use of the standard under development.
- Made the "Call for Potentially Essential Patents" thereby providing an opportunity for participants to identify patent claim(s)/patent application claim(s) and/or the holder of patent claim(s)/patent application claim(s) of which the participant is personally aware and that may be essential for the use of that standard.
 - There were no responses to the call.

Attendance is in section 1.

Tuesday 12 November 2019

8:02 AM call to order by the TG Chair

At the beginning of the meeting the TG Chair presented the IEEE-SA Copyright Policy slides <https://standards.ieee.org/content/dam/ieee-standards/standards/web/documents/other/copyright-policy-WG-meetings.potx>, and the IEEE-SA PatCom Patent Slides for Standards Development Meetings <https://development.standards.ieee.org/myproject/Public/mytools/mob/slideset.pdf>, the IEEE 802 Participation slide <https://mentor.ieee.org/802-ec/dcn/17/ec-17-0093-05-0PNP-ieee-802-participation-slide-ppt.ppt>, and made the Call for Potentially Essential Patents. There were no responses to the call prior to the end of the meeting.

The TG Chair:

- Introduced the agenda per *Maintenance Task Group Meeting November 12, 2019 Agenda* in <http://www.ieee802.org/1/files/public/docs2019/maint-congdon-session-1119-v01.pdf> that was approved.
- Presented *Document Vehicles -Status Update* in <http://www.ieee802.org/1/files/public/docs2019/maint-congdon-session-1119-v01.pdf>.
- Led the discussion of open and new maintenance items.
 - [0243](#) – Maintenance request on IEEE 802.1Q
 - [0244](#) – Minor maintenance item for 802.1Q

- [0245](#) – Another small maintenance item for 802.1Q-2018
- [0246](#) – IEEE Std 802.1Q-2018: Color-aware flow meters are color-blind

Disposition: Details for discussion on all new items were logged in the IEEE 802.1 Maintenance database at <https://www.802-1.org/home> where items progressed at the meeting can be reviewed by selecting 'Meetings'.

- Led the discussion on:
 - *LS on OTNT Standardization Work Plan*
http://www.ieee802.org/1/files/public/docs2019/liaison-SG15-LS216-OTNT_standardization_workplan-1019.zip
 - Jodi Haasz's *Attachment 1*
<http://www.ieee802.org/1/files/public/docs2019/maint-haasz-itu-roadmap-report-1109-v01.pdf> prepared to be part of the *Liaison Statement to TU-T JCA IMT-2020*

Disposition: The WG Chair requested the Maintenance TG Chair to produce liaison responses and attach the response documents. Motions were added to the EC consent agenda to forward those liaison responses. The liaison responses, including the response documents, were finalized as *Liaison Statement to ITU-T SG15 OTNT* <http://www.ieee802.org/1/files/public/docs2019/liaison-response-SG15-OTNT-1119-v01.pdf> and *Liaison Statement to ITU-T JCA IMT-2020* <http://www.ieee802.org/1/files/public/docs2019/liaison-ITU-T-JCA-IMT-2020-1119-v01.pdf>.

Karen Randall presented *ISO/IEC JTC1 SC6 Status* in

<http://www.ieee802.org/1/files/public/docs2019/maint-congdon-session-1119-v01.pdf>.

Disposition: None.

James Glib led a discussion on *P802.1ACct* <https://1.ieee802.org/maintenance/802-1acct/>.

Disposition: James Glib, P802.1ACct editor, has created an initial draft of the amendment. A link to the draft was not available but the editor will work with the TG Chair to put the draft into the relevant locations on the 802.1 repository and launch an initial Task Group ballot.

Roger Marks presented *Clarifying EPD and LPD*

<http://www.ieee802.org/1/files/public/docs2019/maint-Marks-Finn-epd-lpd-1119-copyright.pdf>.

Disposition: The scope of changes required to clarify the EPD and LPD confusion is likely beyond what can be covered by a maintenance item(s). There may be some small bugs that can be fixed in IEEE Std 802, IEEE Std 802.1AC, IEEE Std 802.1Q and/or IEEE Std 802.11 as forthcoming maintenance items, but to completely satisfy a clarification to the confusion, revision or amendment projects may be needed.

Future meetings/teleconferences

The TG intends to hold teleconferences on Tuesday January 14, 2020 and Tuesday March 10, 2020 at 8:00 AM Pacific, unless cancelled prior to the call.

The TG meets face-to-face next at the January 2020 interim session.

1:35 PM call to order by the TG Chair

P802.1X-Rev D1.5 SA recirculation ballot resolution

Mick Seaman, P802.1X-Rev Editor, presented the disposition <http://www.ieee802.org/1/files/private/x-rev-drafts/d1/802-1X-Rev-d1-5-sponsor-recirc-dis.pdf> of comments received on <http://www.ieee802.org/1/files/private/x-rev-drafts/d1/802-1X-rev-d1-5.pdf>. The ballot had passed with 100% approval and 84% response rate.

Disposition: The meeting agreed (informally, none dissenting) to proceed to RevCom without further changes to D1.5 or to the disposition of comments. Editorial comments would be passed to the IEEE editor.

[On Friday November 15, 2019, the EC approved progression to RevCom.]

P802.1AE-2018-Cor1 D1.0 Working ballot resolution

Mick Seaman, P802.1AE-2018-Cor1 Editor, presented the disposition <http://www.ieee802.org/1/files/private/ae-2018-cor-1-drafts/d1/802-1AE-2018-Cor1-d1-0-dis.pdf> of comments received on <http://www.ieee802.org/1/files/private/ae-2018-cor-1-drafts/d1/802-1AE-2018-Cor1-d1-0.pdf>. The ballot had passed with 100% approval and 84% response rate. This disposition captured the results of the discussion in the Edinburgh, September 2019, interim session.

Disposition: The meeting agreed (informally, none dissenting) to proceed to SA ballot without further changes to D1.0 or to the disposition of comments.

[On Friday November 15, 2019, the EC approved progression to SA ballot]

MAC Privacy protection

The TG Chair led a discussion of frame packing, individual frame fragmentation and reassembly aimed at increasing mutual understanding of the problem space.

Don Fedyk presented *Frame Format for IEEE 802.1AEdk MACsec Privacy* <http://www.ieee802.org/1/files/public/docs2019/dk-fedyk-dot1aedk-dataformat-discussion-1105-v01.pdf>.

- Discussion started.
- **3:10 – 3:35 PM recess**
- Discussion continued. Noted: some advantage to the modified proposal (slide 9, more fragments per frame); attempt to reduce impact on QoS; detailed description of transmission (packing, fragmentation) and reception (unpacking, reassembly) processes beyond implicit (not always clear) indications in format required to assess benefits; not a lot of enthusiasm for alternative (slide 11); is to use terminology that requires development (slide 13), 'tunnel' already overused, MSDU already used as MAC Service Data Unit in 802.1, 'chunk' seems a promising term (at least in informal discussion) for an entire packet or the fragment of a packet contained in a 'superframe' (MAC Privacy PDU – MPPDU –, there may be a better informal term).

Disposition: Continued later.

4:50 PM recess

Tuesday 12 November 2019

10:30 AM call to order by the TG Chair

P802E Privacy D1.6 Working Group recirculation ballot resolution

Jerome Henry, P802E Editor, led a discussion of the proposed disposition <http://www.ieee802.org/1/files/private/802-e-drafts/d1/802E-d1-6-pdis2.pdf> of comments received on <http://www.ieee802.org/1/files/private/802-e-drafts/d1/802E-d1-6.pdf>, continuing the October 30, 2019 teleconference discussion.

- **11:40 AM: in the temporary absence of the TG Chair, Karen Randall presided.**

Disposition: The meeting agreed (informally, none dissenting) to proceed to SA (sponsor) ballot. Final disposition recorded in <http://www.ieee802.org/1/files/private/802-e-drafts/d1/802E-d1-6-dis.pdf>.

[On Friday November 15, 2019, the EC approved progression to SA ballot]

MAC Privacy protection

Don Fedyk led a continuation of Monday afternoon's discussion.

- **12:30 – 2:00 PM recess, after which the TG Chair presided**
- Discussion continued.
- **3:00 – 3:30 PM recess**
- Discussion continued.
- The diagrams in *Aggregation Discussion* <http://www.ieee802.org/1/files/public/docs2019/dk-fedyk-dot1aedk-aggregation-discussion-1119-v01.pdf> were developed during discussion.

Disposition: Further discussion needed. A full survey of options and any preliminary decisions would be undertaken after PAR approval.

A.O.B: MKA Key Server changes

The TG chair led a brief discussion of a potential modification to the 802.1X MKA CP state machine conditions (802.1X subclause 12.4). The desire, raised in discussion in past meetings, was to minimize disruption in a group CA when a higher-priority Key Server takes over (particularly when that Key Server system has been restored following a failure). A difficulty is distinguishing that case from a group merge where some signaling to upper layers via `controlledPortEnabled = FALSE` (thus blipping `MAC_Operational`) is desirable to avoid the instant creation of a hard loop. It may be possible to limit the duration of the disruption by changing the `RETIRE.chgdConnect` transition to `CHANGE` to require a newSAK to already have been distributed if the only reason for that transition is a change in Key Server. Assuming all existing CA participants receive the newSAK transmission, that would allow each to rapidly transition `CHANGE-SECURED-RECEIVING-READY-TRANSMIT-TRANSMITTING` with no external dependencies thus reducing the `MAC_Operational` blip for each participant to the minimum required by that participant for internal protocol stack communication.

Disposition: Further discussion needed. Formal presentation and analysis required.

A.O.B: MKA scaling and new environments

The TG chair led a brief discussion of comments on other aspects of MKA, arising from the prior discussion. While the introduction of multiple SCs per SecY was intended to address the need for strict replay/order protection for preemption (two SCs required) or common service provider service level distinctions (two or three SCs required) it had led to a demand for the support of eight SCs per SecY, with a very large number of SecYs per system and hence a requirement for many MKA instances and a high processing load for MKA ICV generation and verification. Some reduction in this load was desired. Separately the use of MACsec on high delay (extra-terrestrial) links was noted, with some desire for timeout value adjustment.

Disposition: Further study needed. Formal input required.

5:25 PM recess

Wednesday 13 November 2019

10:35 AM call to order by the TG Chair

MAC Privacy protection

<http://www.ieee802.org/1/files/public/docs2019/dk-security-mac-privacy-CSD-0919-v00.pdf> for P802.1AEdk.

[On Friday November 15, 2019, the EC approved submission of the PAR to NesCom.]

11.40 AM: in the temporary absence of the TG Chair, Karen Randall presided.

MAC Privacy protection

Don Fedyk led a continuation of Tuesday afternoon's discussion.

Disposition: Continued later.

12:30 PM – 1:35 PM recess

Future Meetings

Nendica will meet during the 802.1 January 2020 interim session in Geneva, Switzerland.

The meeting agreed (none dissenting) to schedule a teleconference on December 12, 2019 at 9:00 AM US Eastern Time. The Chair will indicate to the organizers of the 802 Wireless Interim (of January 13, 2020 in Irvine, CA, USA) that Nendica may meet for two hours during that session, with decision to cancel that meeting possible during the teleconference of December 12, 2019.

Any Other Business

The Nendica Chair thanked the participants and particularly Guido Hiertz for recording the minutes on Tuesday evening and standing in as Acting Chair for a time.

No further business was discussed in this session.

09:54 AM adjournment

8 YANGsters

Minutes of YANGsters conference calls are available at <https://1.ieee802.org/yangsters/>.

The YANGsters Vice-Chair and Secretary, Stephan Kehrer, presided as acting YANGsters Chair and wrote the minutes.

Attendance is in section 1.

Tuesday 12 November 2019

6:05 PM call to order by the acting YANGsters Chair

The acting YANGsters Chair presented the IEEE-SA PatCom Patent Slides for Standards Development Meetings <https://development.standards.ieee.org/myproject/Public/mytools/mob/slideset.pdf>, the IEEE 802 Participation slide <https://mentor.ieee.org/802-ec/dcn/17/ec-17-0093-05-0PNP-ieee-802-participation-slide-ppt>, and made the “Call for Potentially Essential Patents”. There were no responses to the call prior to the end of the week’s meeting.

The acting YANGsters Chair presented the IEEE SA Copyright Policy slides and the agenda in <http://www.ieee802.org/1/files/public/docs2019/yangsters-smansfield-meeting-29-agenda-1119-v03.pdf>.

- An additional topic was raised on the existence of an open maintenance item (<https://www.802-1.org/items/357>) concerning a collection of YANG related issues in IEEE Std 802.1Qcp-2018.
- Due to the heavy workload on YANGsters the suggestion was made to the group to have teleconferences weekly instead of monthly.

Disposition: The agenda was reviewed, discussed and approved.

The acting YANGsters Chair gave an introduction on *IEEE EtherTypes*. The 802.1 Chair summarized the results of the offline discussions that have taken place since the September 2019 interim session with IEEE Staff and IEEE Legal as well as with the RAC Chair. The RAC Chair provided additional information on that.

YANGsters then discussed the P802f PAR and CSD in light of this information and discussed the disposition of comments on the P802f PAR and CSD from 802.3 and 802.11 in anticipation of further discussion in the TSN TG the following day.

Disposition: Responses to the comments on the P802f PAR and CSD from 802.3 and 802.11 will be worded according to the discussions of this YANGsters meeting. The P802f PAR needs to reflect and highlight that a close interaction of 802.1 and the RAC is needed for the project.

The acting YANGsters Chair provided an overview on the topic of *Units* in IEEE 802.1 YANG modules. Currently there is no unified way defined in 802.1 to describe units in YANG modules. A list needs to be provided to editors that would give information and guidance on units and

should be used in 802.1 YANG modules. This should be generated in coordination with IEEE editorial staff.

Disposition: YANGsters will provide information in the YANGsters guidelines on how to express units and what unit names are to be used.

The acting YANGsters Chair provided a *Meta Data Update*. When a YANG module is put into the “published” branch the following information has to be provided:

- maturity level
- document name
- reference
- module classification

Disposition: The proper metadata will be added once the document has been published. This will be done in coordination with Mark Ellison and Scott Mansfield.

The acting YANGsters Chair postponed the *Discussion on Constraint Checking* to the next teleconference by lack of time.

Disposition: None.

The acting YANGsters Chair presented a draft motion requesting new teleconferences. The motion text was updated to reflect the earlier decision to hold teleconferences weekly instead of monthly for the time being.

Disposition: Updated motion reviewed for 802.1 closing plenary approval.

Any Other Business

The discussion on the topic of an open maintenance item related to YANG was postponed to one of the next YANGsters teleconferences by lack of time.

7:45 PM adjournment
