INSTRUCTIONS FOR THE WG CHAIR

The IEEE SA strongly recommends that at each WG meeting the chair or a designee:

- Show slides 1 through 4 of this presentation
- Advise the WG attendees that:
 - IEEE's patent policy is described in Clause 6 of the *IEEE SA Standards Board Bylaws*;
 - Early identification of patent claims which may be essential for the use of standards under development is strongly encouraged;
 - There may be Essential Patent Claims of which IEEE is not aware. Additionally, neither IEEE, the WG, nor the WG Chair can ensure the accuracy or completeness of any assurance or whether any such assurance is, in fact, of a Patent Claim that is essential for the use of the standard under development.
- Instruct the WG Secretary to record in the minutes of the relevant WG meeting:
 - That the foregoing information was provided and that slides 1 through 4 (and this slide 0, if applicable) were shown;
 - That the chair or designee provided an opportunity for participants to identify patent claim(s)/patent application claim(s) and/or the holder of patent claim(s)/patent application claim(s) of which the participant is personally aware and that may be essential for the use of that standard
 - Any responses that were given, specifically the patent claim(s)/patent application claim(s) and/or the holder of the patent claim(s)/patent application claim(s) that were identified (if any) and by whom.
- The WG Chair shall ensure that a request is made to any identified holders of potential essential patent claim(s) to complete and submit a Letter of Assurance.
- It is recommended that the WG Chair review the guidance in *IEEE SA Standards Board Operations Manual* 6.3.5 and in FAQs 14 and 15 on inclusion of potential Essential Patent Claims by incorporation or by reference.

Note: **WG** includes Working Groups, Task Groups, and other standards-developing committees with a PAR approved by the IEEE SA Standards Board.

PARTICIPANTS HAVE A DUTY TO INFORM THE IEEE

- Participants shall inform the IEEE (or cause the IEEE to be informed) of the identity of each holder of any potential Essential Patent Claims of which they are personally aware if the claims are owned or controlled by the participant or the entity the participant is from, employed by, or otherwise represents
- Participants should inform the IEEE (or cause the IEEE to be informed) of the identity of any other holders of potential Essential Patent Claims

**Early identification of holders of potential
Essential Patent Claims is encouraged**

WAYS TO INFORM IEEE

- **Cause an LOA to be submitted to the IEEE SA (patcom@ieee.org); or**
- **Provide the chair of this group with the identity of the holder(s) of any and all such claims as soon as possible; or**
- **Speak up now and respond to this Call for Potentially Essential Patents**

If anyone in this meeting is personally aware of the holder of any patent claims that are potentially essential to implementation of the proposed standard(s) under consideration by this group and that are not already the subject of an Accepted Letter of Assurance, please respond at this time by providing relevant information to the WG Chair

[March 2022 IEEE 802 LMSC Executive Committee election process](#)

802.1 WG elections

- 802.1 process for chair and vice-chair
 - Nominations are open until the start of the closing 802.1 plenary meeting on March 15th . The election will be during the March 15th closing plenary meeting.
 - If there are multiple nominees for a post, then a secret ballot election will take place in which only 802.1 voters participate and in which each voter casts a single vote for their preferred candidate. To win the election, a majority of voters present is required. If a majority is not achieved, then the candidate with the least number of votes is eliminated and the vote re-taken.
 - A motion to approve the winning candidate (in the case of an election) or the single nominee (in the event that there is only one candidate for the post) will then be made and voted upon by 802.1 voting members.

Straw polls for closing plenary

1. When do you expect the next in-person 802.1 session will be?

Nendica status report

Excerpt from the Purpose of the approved [ICAID](#)

- Document emerging requirements and directions for IEEE 802 networks
- Encouraged topics include enhancements of IEEE 802 communication networks and vertical networks
- Topics concerning higher-layer applications related to new standards development in the IEEE 802.1 Working Group are also specifically expected and encouraged

ICA Overview

- IEEE 802 “*Network Enhancements for the Next Decade*” Industry Connections Activity (ICA)
 - ICA: Industry Connections Activity
 - Authorized by IEEE SA
 - Through “Industry Connections Committee (ICCom)”
 - via an “Industry Connections Activity Initiation Document (ICAID)”, parallel to a PAR
 - “Industry Connections activities provide an efficient environment for building consensus and developing many different types of shared results. Such activities may complement, supplement, or be precursors of IEEE Standards projects, but they do not themselves develop IEEE standards.”

Nendica History

- Outgrowth of a recommendation of IEEE 802 5G Standing Committee of 2016
 - Seeking “an external view into general 802 access network” to “support many 802 MACs and PHYs”
 - that view evolved during ICAID development
- ICAID
 - March 2017 - March 2019: original ICAID IC17-001-01
 - March 2019 - March 2021: renewed ICAID IC17-001-02
 - Sept 2021 - Sept 2022: renewed ICAID IC17-001-03

Nendica “Motivation and Goal”

- The goal of this activity is to document emerging requirements and directions for IEEE 802 networks, identify commonalities, gaps, and trends not currently addressed by IEEE 802 standards and projects, and facilitate building industry consensus towards proposals to initiate new standards development efforts. Encouraged topics include enhancements of IEEE 802 communication networks and vertical networks as well as enhanced cooperative functionality among existing IEEE standards in support of network integration. Topics concerning higher-layer applications related to new standards development in the IEEE 802.1 Working Group are also specifically expected and encouraged. Findings related to existing IEEE 802 standards and projects are forwarded to the responsible working groups for further considerations.

 - Initiated March 2021
- Vetting Topics
 - ICAID renewal proposal says “Topics concerning higher-layer applications related to new standards development in the IEEE 802.1 Working Group are also specifically expected and encouraged.”
 - on July 20, 2021, the IEEE 802.1 WG Chair notified the 802.1 WG Opening Plenary Meeting of
 - “Migration towards vetting all new work in Nendica”
 - “Strong proposals can be directed to the TG/WG to initiate a PAR; Proposals needing more consensus can be further developed.”
 - Completed topics:
 - PFC headroom (led to PAR P802.1Qdt for March consideration)
 - Pulsed Queuing: vetted and transitioned to TSN
 - Recent topics reported below.

ELLA

- Support IEEE 802 activities toward the revision of IEEE Std 802
- Decided to pursue two PAR directions:

1. Maintenance Revision

- Draft ELLA Report finalized 2022-01-27
- Report and Proposed PAR content passed to Technical Plenary & Maintenance TG
- PAR forwarded to 802 EC & NesCom
- Anticipating project authorization in March (Maintenance TG)

2. Comprehensive amendment(s)

- Expect to extend ELLA Report by May 2022
- Recommend that Maintenance TG brings a motion at 802.1 Closing Plenary (March 2022):
 - *802.1 authorizes pre-circulation to the July IEEE 802 Plenary Session of one or more PARs/CSDs to amend IEEE Std 802, as reviewed in the Maintenance Task Group, based a Nendica report on the topic and considering information from the 802 Technical Plenary.*

CTF

- Study Item: “Cut-Through Forwarding in Bridges and Bridged Networks”
- Tentative goals
 - Develop IEEE 802 Plenary tutorial on Cut-Through Forwarding (CTF)
 - Identify and analyze relevant technical elements in IEEE Std 802.3
 - Discuss administrative and technical aspects of potential lower layer modelling across IEEE 802.3 and IEEE 802.1 with support for CTF
 - Discuss contributions with input for PAR&CSD of a potential IEEE 802.1 project for standardizing CTF (standalone standard):
 - With support for *IEEE 802.3 compatible real implementations*
 - Incorporate lower layer model with support for CTF, if such a model becomes available during such a project.
- Consensus-building report (September 2021)
 - *Nendica consensus is that further discussion should be brought to the 802.1 WG or a Task Group.*
- Led to PAR P802.1DU for March consideration
- Study Item remains on weekly agenda, 0 minutes allocated
- Has been following up to make video of July tutorial widely available
