INSTRUCTIONS FOR THE WG CHAIR

The IEEE SA strongly recommends that at each WG meeting the chair or a designee:

- Show slides 1 through 4 of this presentation
- Advise the WG attendees that:
 - IEEE's patent policy is described in Clause 6 of the *IEEE SA Standards Board Bylaws*;
 - Early identification of patent claims which may be essential for the use of standards under development is strongly encouraged;
 - There may be Essential Patent Claims of which IEEE is not aware. Additionally, neither IEEE, the WG, nor the WG Chair can ensure the accuracy or completeness of any assurance or whether any such assurance is, in fact, of a Patent Claim that is essential for the use of the standard under development.
- Instruct the WG Secretary to record in the minutes of the relevant WG meeting:
 - That the foregoing information was provided and that slides 1 through 4 (and this slide 0, if applicable) were shown;
 - That the chair or designee provided an opportunity for participants to identify patent claim(s)/patent application claim(s) and/or the holder of patent claim(s)/patent application claim(s) of which the participant is personally aware and that may be essential for the use of that standard
 - Any responses that were given, specifically the patent claim(s)/patent application claim(s) and/or the holder of the patent claim(s)/patent application claim(s) that were identified (if any) and by whom.
- The WG Chair shall ensure that a request is made to any identified holders of potential essential patent claim(s) to complete and submit a Letter of Assurance.
- It is recommended that the WG Chair review the guidance in *IEEE SA Standards Board Operations Manual* 6.3.5 and in FAQs 14 and 15 on inclusion of potential Essential Patent Claims by incorporation or by reference.

Note: **WG** includes Working Groups, Task Groups, and other standards-developing committees with a PAR approved by the IEEE SA Standards Board.

PARTICIPANTS HAVE A DUTY TO INFORM THE IEEE

- Participants shall inform the IEEE (or cause the IEEE to be informed) of the identity of each holder of any potential Essential Patent Claims of which they are personally aware if the claims are owned or controlled by the participant or the entity the participant is from, employed by, or otherwise represents
- Participants should inform the IEEE (or cause the IEEE to be informed) of the identity of any other holders of potential Essential Patent Claims

**Early identification of holders of potential
Essential Patent Claims is encouraged**

WAYS TO INFORM IEEE

- **Cause an LOA to be submitted to the IEEE SA (patcom@ieee.org); or**
- **Provide the chair of this group with the identity of the holder(s) of any and all such claims as soon as possible; or**
- **Speak up now and respond to this Call for Potentially Essential Patents**

If anyone in this meeting is personally aware of the holder of any patent claims that are potentially essential to implementation of the proposed standard(s) under consideration by this group and that are not already the subject of an Accepted Letter of Assurance, please respond at this time by providing relevant information to the WG Chair

OTHER GUIDELINES FOR IEEE WORKING GROUP MEETINGS

 - Don't discuss the interpretation, validity, or essentiality of patents/patent claims.

- Don't discuss or engage in the fixing of product prices, allocation of customers, or division of sales markets.
- Don't discuss the status or substance of ongoing or threatened litigation.
- Don't be silent if inappropriate topics are discussed. Formally object to the discussion immediately.

Participants in the IEEE-SA “*individual process*” shall act independently of others, including employers

- The [IEEE-SA Standards Board Bylaws](#) require that “*participants in the IEEE standards development individual process shall act based on their qualifications and experience*”
- This means participants:
 - **Shall act & vote** based on their personal & independent opinions derived from their expertise, knowledge, and qualifications
 - **Shall not act or vote** based on any obligation to or any direction from any other person or organization, including an employer or client, regardless of any external commitments, agreements, contracts, or orders

IEEE-SA standards activities shall allow the fair & equitable consideration of all viewpoints

- The [IEEE-SA Standards Board Bylaws](#) (clause 5.2.1.3) specifies that *“the standards development process shall not be dominated by any single interest category, individual, or organization”*
 - This means no participant may exercise *“authority, leadership, or influence by reason of superior leverage, strength, or representation to the exclusion of fair and equitable consideration of other viewpoints”* or *“to hinder the progress of the standards development activity”*
- This rule applies equally to those participating in a standards development project and to that project’s leadership group
- Any person who reasonably suspects that dominance is occurring in a standards development project is encouraged to bring the issue to the attention of the Standards Committee or the project’s IEEE-SA Program Manager

Hi Ben,
Just to follow up on this ballot. I have uploaded the resolution of comments to IEEE myProject. myProject, while requiring a Disapprove vote to be accompanied with a Must Be Satisfied comment does not take into account WITHDRAWN comments – so you now formally have a Disapprove with no outstanding Must Be Satisfied comments.
While the D2.2 Recirculation Ballot is closed (no further comments accepted), you can (if you wish) login to myProject and change your vote to Abstain or Approve.
That would save time in the processing steps, and avoid the need to go over the vote/withdrawal/myProject scenario with the EC and RevCom.
Thank you for your help in this process.

Hi Ben,

I was hoping to catch up with you in person in the 802.1/802.15 Joint Meeting (which is happening just now).

You had a number of Must Be Satisfied comments on the 1st Recirculation SA Ballot of P802.1AEdk.

I think you had not noticed that this was a Recirculation Ballot. We had very few changes on the Initial SA Ballot, with only one Disapprove with one MBS Comment. This comment required the inclusion of the EtherType to be assigned at SA Ballot time in the draft. This was done prior to Draft 2.2 which was the subject of the Recirculation Ballot.

The comments you had made on the ballot were thus formally Out of Scope.

However we have considered all the comments, and the CRG consensus is that we should not change the draft further. You did have a number of comments about the text in NOTES, but all this text is properly Informative – while it may appear substantive all the statements made (for the purpose of drawing the reader's attention to the normative

Another inappropriate note. This one describing a technical characteristic, even a requirement, on "shim" and how it is used. Technical content appropriate to a normative clause. Also, the definition seems not very helpful. This sent me searching for a technical definition of "shim" which I did not find. though I know what it means where it is used from the context, which is sufficient. So really, you don't need it here. If you think someone wont know what shim means in this standard, add a technical description of what a shim provides and perhaps requirements for what constitutes a shim in an appropriate normative clause.

This is specifying (as is the entire clause) behaviors of entities outside the scope of this standard. i.e. suppliers of implementations of the standard.
It is way past time to remove "shalls" that describe behavior of implementers and suppliers, rather than of the conforming implementation, from this clause and the PICS. "Shall", "may" and "should" properly behaviors within the scope of this standards.
SuggestedRemedy
Change "shall provide" to "provides". and "shall complete" to "completes". At least in the new text. Don't make it worse.

The ballot cover letter noted that as per the IEEE-SA Standards Board Manual 5.4.3, once 75% approval is achieved subsequent ballots shall be based only on changed portions, portions affected by changes, or portions that are subject of Unresolved comments associated with Do Not Approve votes. Only one Do Not Approve vote was received on the Initial SA Ballot (requiring EtherType assignment) and the only subsequent changes to the draft were the inclusion of the assigned EtherType, the MIB OID assignment suggested in the cover letter for the initial ballot, the minor editorials suggested in that cover letter, correction of a URL reference (comment I-2) and one change from "integral" to "integer" (comment I-7).				
Note that this comment would have been rejected even if in Scope. Note that this comment would have been rejected even if in Scope. The question of the possible loose definition of "traffic" has arisen in the discussion of related standards and an explicit definition was added to satisfactorily conclude potentially long running discussions. The notions of traffic types, traffic classes, traffic engineering, TSN traffic, AV traffic are important in related standards (notably IEEE Std 802.1Q) and it is useful for this standard (which provides services that can be used by those standards) to consider 'traffic' as a sequence of frames.

Note that this comment would have been rejected even if in Scope. There is normative material concerning fragments and fragmentation in throughout this amendment (notably but not exclusively in 17.3.3, 17.4, 18.1, 18.4, and Clauses 19 and 20) and reminding the reader of the information in this note at all points would be tedious, and not necessarily successful in making the point that throughout this standard we are not considering IP fragmentation. This point is relevant to Privacy Channels because their use involves fragmentation but also extends to the immediately following definition of Privacy Frame.

The requirement that a supplier of implementation *shall* complete a PICS to make a claim of conformance to this standard is an important and well established part of IEEE 802 standards and their adoption by ISO going back (at least) to IEEE 802.1D-1990. The referenced text "The supplier ... implementation that is claimed to conform ... shall complete ... the PICS proforma" is used in the base standard (802.1AE-2018), in IEEE Stds 802.1Q, 802.1AR, 802.1AS, 802.1AX, 802.1BA, 802.1CB, 802.1CM, and 802.1X. The requirement (with "shall") is also stated for all the capabilities standardized in IEEE Std 802.3-2022 with 179 instances of "supplier ... shall complete", for IEEE Std 802.11-2020 ("supplier of a protocol implementation that is claimed to comply with IEEE Std 802.11-2020 shall complete the ...PICS..."), in the PICS annexes for IEEE Stds 802.15.1-2002, 802.15.3.2003, and 802.15.4-2015, and in 802.21-2009.</p> <p>In all cases it is important have a definitive statement of implemented provisions in a given implementation when a supplier claims conformance.</p>
