Dear Mr. Hayes:

Thank you for your reply liaison statement to T1P1 statement to T1P1 (T1P1/91-115) of September 11, 1991 concerning the work of IEEE 802.11. To further assist our work, we would appreciate receiving any documentation available concerning services definitions, functional requirements, proposed architectures, and interfaces for wireless LAN applications.

Although our proposed low complexity telephony interface is not yet defined, it will have some data transmission capabilities, possibly in the range of 1 Kb/a to 1 Mb/s. Our system could possibly be an access vehicle to your wireless LAN, and we would be grateful to receive any suggestions for such personal communications data service descriptions.

Sincerely,

Stephen J. Engelman

Dear Mr. Hayes:

T1P1.1, the Program Management Working Group of T1P1, has been discussing a Program Management process for Personal communications standards. It has placed on the agenda of its next meeting a full day to further explore the concept of Program Management for Personal Communications standards, to gather further information about the respective work plans of standards bodies concerned with this subject and to explore possible Program management methods to manage and facilitate standards work among the various involved bodies.

802.11 is requested to send a representative or representatives to this meeting which will be held on Tuesday, 7 January 1992, in Florida. The location will be between Miami and Ft. Lauderdale and specific meeting details will be provided as soon as they are available.

You may contact Gary Fishman, T1P1.1 chair, if you have any questions about this meeting.

Subject: T1P1.1 Program Management meeting

As requested by liaison letter to TR45 (T1P1/91-141) and IEEE 802.11 (T1P1/91-142), and by invitation to the T1 Technical Subcommittee chairmen at the October 1991 T1/T1AG meeting, T1P1.1 has asked that each of the subject areas in your respective committees that may be involved with Personal Communications standards send a representative to the next meeting of T1P1.1 (Program Management). At that time, we want to continue to explore the concept of Program Management, to gather further information about the respective work plans of your committees and to explore possible Program Management methods to manage and facilitate standards work amongst our committees.

The meeting notice for T1P1 is attached, and the T1P1.1 session referred to above will take place from 8:00 am to 5:00 pm on Tuesday, January 7, 1992.

For your information and guidance, a draft agenda for that day is attached. As reported to T1, our intention is to make this a cooperative process, not one in which T1P1.1 takes unilateral actions, so the participation of your representatives is very important.

Best regards,

Gary

G. Fishman
Chairman, T1P1.1

Att: T1P1 meeting notice, 6-10 January 1992
Draft agenda, T1P1.1, 7 January 1992

T1P1.1
DRAFT AGENDA
JANUARY 7, 1992
PLANTATION, FLORIDA

1. Review T1 mandate to T1P1 and the T1P1.1 Mission and Scope statements - G. Fishman
2. Goals of a Program Management process for Personal Communications standards - all
3. Review CCITT Resolution 18 ad hoc group report on coordination of complex projects in multiple Study Groups - G. Fishman
 - 3.1 Telecommunication Standards Advisory Group (TSAG)
 - 3.2 Joint Coordination Groups (JCG)
4. Review current and planned activities relating to Personal Communications standards, including: - all
 - What is, or will be, under study
 - What groups are doing the work
 - When did activity start and when is stable text anticipated
 - What interactions with other standards bodies are planned (e.g., liaison with Committee x, contributions to CCIR SG y)
5. Develop potential Program Management methods and plans - all
