Report of LMSC Ballot on IEEE P802.11/D5.0

Date: November 6, 1996

Author: Vic Hayes, Chair IEEE P802.11
Lucent Technologies WCND
Zadelstede 1-10
Phone: +31 30 609 7528
Fax: +31 30 609 7556
e-Mail: v.hayes@ieee.org

The LMSC ballot on draft standard IEEE P802.11/D5.0 closed on October 30, 1996, that was after one extension from the original closing date of October 24, 1996 due to insufficient responses (66%).

Ballot result

118 Number of eligible people in Ballot Group

69 Affirmative votes

11 Negative votes

11 Abstentions

91 Votes = 77 % Returned (75 % required)
12 % Abstention

69 Affirmative votes

11 Negative votes

80 Votes =- 86 % Affirmative

Comments

I have made the best effort to consolidate the comments into a set of documents with document numbers consisting of the number and a sequence number. This document is **1**, **-2** is the general comment and comment on clauses 0-5; **3** is on clauses 6-9 (MAC), **-4** is on clauses 10 and 11 (management), **-5** is on clauses 12-16 (PHY) and **-6** is on the annexes. Note, if the cell in the column Voter's ID is shaded, the comment is from a non-eligible person, if the cell in the column labelled Part of No vote, then the commenter marked his comment as part of his no vote, but he was non-eligible.

The comments have been sorted on section number. I have NOT included the Sequence number; I leave that to the resolution preparing members.

Tables with votes and with initials

The remainder of this document shows the vote per individual including their Voter's ID code..

Please let me know if your comments were not correctly represented in this document.

Legend for Voters list:

Class is the voter status A is academic, P is producer, G is general interest and U is user.

vote: y is approve, y1 is approve with comments, n is do not approves, a1 is abstain due to lack of time, a2 is abstain due to lack of expertise.

comments y is comments included

Legend for Other Reviewers list:

Response r is response received, r1 is response received with comments

comment: y is comments have been included, y? is unclear comments and included.

Legend for Coordination:

Response r is response received, r1 is response received with comments

comment: y is comments have been included, y? is unclear comments and included.
