	Fax: +31 30 609 7556	
	e-Mail: vichayes@lucent.com	

The 3<sup>rd</sup> recircualtion ballot closed on January 4, 1999. The approval rate Is 100 %. One comment received from Vic Hayes (vh). The Chair did receive a file with comments from Michael Fischer, stating that the comments and ballot was also sent to the IEEE Ballot Service. However, the Ballot Service did not receive his vote nor comment.

The following comments were receive in time at the IEEE Ballot service:

Seq.	Clause	your	Cmnt		Comment/Rationale	Recommended change	Disposition/Rebuttal
#	number	voter'	type	of			
		s id	Е, е,	NO			
		code	T, t	vote			
1	5.1.1	VH	E		The Ministry of Post and telecommunications of	<b>Remove the following:</b>	
					Japan has withdrawn MPT notice 759, 1992.	"(e.g., Japan in MPT notice No. 759,1992	
					To follow this change in the legal requirements, the	for the content for identification signals as	
					sentence in parenthesis lost its base.	meant in Article 25 of the ITU Radio Regulations)"	

The following comments were received only at the Chair of the Working Group. They were not received at the IEEE Ballot Service:

Seq.	Clause	your	Cmnt	Part	Comment/Rationale	Recommended change	Disposition/Rebuttal
#	number	voter'	type	of			_
		s id	E, e,	NO			
		code	T, t	vote			
1	8.2.5	Fmr	e	no	The next-to-last word in the "Note" under Figure 46	change "filed" to "field"	
					is misspelled.		
2	9.3.1	Fmr	e	no	In the left center of Figure 61 the acronym for	change "DFC" to "DCF"	
					Distributed Coordination Function is misspelled.		

eq.	Clause	your	Cmnt	Part	Comment/Rationale	<b>Recommended change</b>	Disposition/Rebuttal
#	number	voter'	type	of			
		s id	E, e,	NO			
		code	T, t	vote			
3	9.3.3.4 and 9.7	Fmr	Ε	no	The third sentence of the second paragraph of this clause is an artifact from the era before all station-to- station traffic in a BSS was required to go via the AP. While the polled CF-Pollable station may send a directed frame to any other station, the ToDS bit in the Frame Control field must be set to 1, as required by clause 7.1.3.1.3, so the RA (address 1) of that frame will be the BSSID, as required by clause 7.2.2,	Delete the third sentence of the second paragraph of 9.3.3.4. Delete the 8 <sup>th</sup> row of Table 22.	
					and the non-CF-Pollable station's address will be in the DA (address 3) field. Accordingly, the frame will be acknowledged by the AP/PC in accordance with the second sentence of this paragraph, and the third sentence is never able to operate.		
					The same editorial artifact is present in the 8 <sup>th</sup> row of Table 22 in clause 9.7. The frame sequence shown in this row does meet all DCF and PCF medium usage rules, but cannot occur because the frame control ToDS and data frame address field usage rules in clause 7 do not permit this sequence ever to occur – if a non-AP station were addressed with ToDS set to 1, the frame would not be acknowledged because the		
					setting of ToDS would prevent the non-AP station		
4	9.6	Fmr	Е	no	from interpreting the frame. The second paragraph refers to "the PHY mandatory rate set" which is not defined elsewhere (most importantly, not defined by the various PHYs).	In the 2 <sup>nd</sup> paragraph, delete the portion of the sentence which reads "or at one of the rates in the PHY mandatory rate set"	
					The same problem with PHY mandatory rates occurs in the 6 <sup>th</sup> (last) paragraph.	In the 6 <sup>th</sup> paragraph, delete the portion of the sentence which reads "if this rate belongs to the PHY mandatory rates,"	

Seq.	Clause	your	Cmnt	Part	Comment/Rationale	Recommended change	<b>Disposition/Rebuttal</b>
#	number	voter'	type	of		8	I I
		s id	Ĕ, e,	NO			
		code	T, t	vote			
5	9.6	Fmr	Ε	no	The constraints on response rate in the 6 <sup>th</sup> (last)	Replace the portion of the sentence	
					paragraph are ambiguous (even after deleting the	following "(either CTS or ACK)"	
					reference to "PHY mandatory rates" addressed in my	with "at the highest rate belonging to	
					comment sequence #4). In particular, it is unclear	the BSSBasicRateSet which is less	
					when to use the "or else" provision, and the mis-use	than or equal to the rate of the	
					of this provision could result in a control response	immediately previous frame in the	
					being sent at a higher rate than was used to send the	frame exchange sequence (as defined	
					previous frame in the frame exchange sequence.	in 9.7)."	
6	10.4.3.2	Fmr	Т	no	The definition of aMPDUDurationFactor is incorrect,	At the end of the first sentence in the	
					because this parameter is a scaling factor, and the	description column, add "expressed	
					actual overhead added by the PHY is calculated using	as a scaling factor applied to the	
					this factor and the actual length of the MPDU.	number of bits in the MPDU. The	
						value of aMPDUDurationFactor is	
					Also, the equations shown for calculating the total	generated by the following equation:	
					time and time to the beginning of any octet are	Truncate[((PPDUbits/PSDUbits)-1) x	
					incorrect because of misplaced parentheses – the	10^9)].	
					quantity aMPDUDurationFactor x 8 x PSDU length is		
					what should be divided by data rate. Furthermore,	Replace the equation for the total	
					since the scaling factor for the one existing PHY	time to transmit a PPDU with:	
					which does expand the MPDU is 33/32, and	"aPreambleLength +	
					aMPDUDurationFactor is listed as an integer, this is	aPLCPHeaderLength + ( (	
					more than just an editorial oversight. Also, the units	(aMPDUDurationFactor x 8 x	
					of "data rate" should be specified as Mbit/s.	PSDUoctets) / 10^9) + (8 x	
						PSDUoctets) ) / data rate	
					Also, the representation of aMPDUDurationFactor is	where data rate is in Mbit/s"	
					inconsistent with the (unmodified) one already		
					present in Annex C (definition of MPDU Duration	Replace the equation for the time to	
					Factor support sort on diagram	the beginning of any octet in the	
					RateAndDurationSorts(31), page 319).	PPDU with:	
						"Truncate[aPreambleLength +	
						aPLCPHeaderLength + ( (	
						(aMPDUDurationFactor x 8 x N) /	
						$10^{9}$ + (8 x N) ) / data rate] + 1,	
1						where data rate is in Mbit/s and"
