Hi All

Due to some process concerns expressed by Dr. Gilb, I am re-running the WG motion to forward P802.15.4R4 draft D06 to RevCom.

The most recent SA Ballot recirculation closed last Friday morning. The revision is currently at 100% approval. There were nine comments submitted by the RAC on language that had been in the draft since the 2011 revision. Upon review with the 802.15.4md CRG, IEEE SA Editorial Staff and the RAC, these comments were ruled non-substantive, ie editorial, and can be addressed during the publication process. The RAC is ok with this determination.

Next step is to forward D06 to RevCom. In order to do that, we need both WG and EC approval. This ballot is for WG approval. Please vote YES, NO, or ABSTAIN. No comments are needed to support a NO vote. This is a mandatory ballot and will count towards maintaining your voting rights. **Ballot closes Friday, April 3 at 5pm et**

*Motion: that 802.15 WG requests unconditional approval from the EC to submit 802.15.4 Revision 4 -D06 to RevCom.*
