Hi All

Here is the next e-ballot. This seeks approval to forward the 802.15.4z PAR title change to NesCom. The change is

from: Enhanced High Rate Pulse (HRP) and Low Rate Pulse (LRP) Ultra Wide-Band (UWB) Physical Layers (PHYs) and Associated Ranging Techniques
to: Enhanced Ultra Wideband (UWB) Physical Layers (PHYs) and Associated Ranging Techniques

Reason for the change is the realization that as work progressed on developing the amendment, the acronyms HRP and LRP were not widely recognized and, in fact, were causing a degree of confusion which is not something you want in a title. The decision was made to simplify things and just use UWB PHYs.. MEC requires the title of the standard and the PAR be the same, hence this request.

Please vote YES, NO, or ABSTAIN. No comments are needed to support a NO vote. This is a mandatory ballot and will count towards maintaining your voting rights. **Ballot closes Sunday, April 5 at 5pm et**

Motion: request the 802.15 WG seek approval from the EC to submit P802.15.4z-current revision to NesCom.

Moved: Tim Harrington
Second: Ben Rolfe
