Venue:

Session #44 San Diego

Purpose:

Report Results from Ad Hoc meeting to harmonize technical requirements contributions.

Notice:

This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.

Release:

The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.

IEEE 802.16 Patent Policy:

The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures <<http://ieee802.org/16/ipr/patents/policy.html>>, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair <<mailto:chair@wirelessman.org>> as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site <<http://ieee802.org/16/ipr/patents/notices>>.

Process

- Use 050r2 as starting point as directed by TG chair
- Go contribution by contribution and consider modifications/additions to 050 to harmonize

Contributions

- 050r2
- 048
- 061
- 054
- 056
- 047
- 072
- 049
- 046
- 051
- 053

Main Points of Discussion

- **Frame Structure Requirement**
 - Discussion on whether there must be one frame structure for both relay and access links
 - Group agreed on wording to leave it open
- **Document Status**
 - Group discussed whether TR document is a binding document or a guideline
 - TG chair clarified that document is a guideline
- **Mandatory/Optional Designations**
 - Mandatory/optional designations specified in the document are guidelines
 - They are current best guess of the group
 - They will be refined as technical proposals come are considered

Ad Hoc Results and Recommendation

- Ad Hoc completed harmonization of contributions based on C80216j-06_050r2
 - Harmonized document is C80216j-06_050r3
- Ad Hoc recommendation is for TG to accept C80216j-06_050r3 as the baseline technical requirements document
