Re:		
Abstract	Minutes of the first conference call of the Relay TG's Frame Structure Adhoc, held on 29 March 2007.	
Purpose	Information	
Notice	This document has been prepared to assist IEEE 802.16. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.16.	
Patent Policy and Procedures	The contributor is familiar with the IEEE 802.16 Patent Policy and Procedures < http://ieee802.org/16/ipr/patents/policy.html >, including the statement "IEEE standards may include the known use of patent(s), including patent applications, provided the IEEE receives assurance from the patent holder or applicant with respect to patents essential for compliance with both mandatory and optional portions of the standard." Early disclosure to the Working Group of patent information that might be relevant to the standard is essential to reduce the possibility for delays in the development process and increase the likelihood that the draft publication will be approved for publication. Please notify the Chair < mailto:chair@wirelessman.org > as early as possible, in written or electronic form, if patented technology (or technology under patent application) might be incorporated into a draft standard being developed within the IEEE 802.16 Working Group. The Chair will disclose this notification via the IEEE 802.16 web site < http://ieee802.org/16/ipr/patents/notices >.	

Frame Structure Adhoc: Minutes of the first conference call

Mike Hart

Date and Time: Thursday 29 March 2007, 13:00 GMT

Attendance:

Chair: Mike Hart

Vice-chair: Dorin Viorel

Participants: Chenxi Zhu	Yousuf Saifullah
Kaibin Zhang	Roger Peterson
Gang Shen	Junhong Hui
Gamini Senarath	D.H.Ahn
Mark Naden	Young-il Kim
Peiyong Zhu	Sunqqeun Jin
Hang Zhang	Suchang Chae
Israfil Bahceci	Young-jae Kim
Ken Loa	Kyu Ha Lee
Hua-Chiang Yin	Jae Hyung Eom
Yung-Ting Lee	Kim Olszewski
Frank Ren	David Comstock
Rakesh Taori	Shulan Feng
Changyoon Oh	Matty Levanda
Adrian Boariu	Gokhan Korkmaz

Minutes:

The meeting started at 14:08 (GMT+1h) on 29 March 2007 with Mike Hart acting as chair and Dorin Viorel as vice-chair. The agenda emailed on Monday 26 March 2007 was followed.

1. Roll call

The participants listed above identified themselves as participating in the meeting.

2. Review of the deferred contributions & comments

07/179: Ken Loa to circulate updated version to the group by email for review and comment immediately following the meeting.

07/215: Peiyong Zhu & Gamini Senarath will provide a recommendation for 07/215 and associated comment to supersede by an already accepted comment.

07/235: Changyoon & Rakesh to email an updated contribution by the middle of next week and will summarise the issues related to the two approaches discussed so far: STC Zone Switch IE and using D/UIUC 13 (Gap region).

Ken Loa raised a potential issue relating to the R-FCH definition accepted in meeting #48 through contribution 07/193. He will check this and send a proposed comment, if necessary, for the group to consider by email.

07/255: Ken Loa to send updated contribution to the group by email on Monday.

07/265: Ken Loa is going to draw a diagram to cover the case of 07/265 and send to the group by email on Monday using same format as the diagram in 07/179. Following review of this diagram the authors of 07/265 will provide an update on how they propose we should proceed with 07/265 considering that it has already been harmonised with 07/144.

07/013: Mike Hart mentioned that he is proposing to supersede by 07/235, pending the outcome of discussions on 07/235 (see above).

07/090r3: Hang Zhang will send email of latest version to trigger discussion on format of MAP for relay zone. Mike Hart suggested that the discussions begin at a high-level first on whether a new MAP message is required or not for the relay zone. Once consensus is reached, then we can discuss the specifics of the message (i.e. format, IE's supported, etc).

07/162r3: The authors will email the latest version to the group, including some notes of the offline discussions they have had with other people on this contribution. Discussion on the technical merit of the contribution will continue by email.

3. Overview of the status of the open topics the ad-hoc needs to work on

The open topics, based on the review of the contributions listed above was discussed and summarised as:

- Frame structure diagrams:
Waiting updated diagrams from Ken Lao to be sent to email list.
- Relay zone location signalling in the access link MAP message:
Waiting updated contribution from Changyoon & Rakesh to be sent to email list
- MAP message for the relay link (new R-MAP or existing DL/UL-MAP):
Start high-level discussion on approach for relay link MAP message (new or existing)
Then work on details once consensus is reached
- New multiple frame format (see 07/162r3):
Authors to solicit comments and questions on 07/162r3 from the adhoc group to start to form opinion on way forward for 07/162r3.

4. Discussion on new areas

The chair asked if anyone had identified any new areas that need to be covered by the adhoc relating to frame structure. No one responded.

David Comstock questioned that the deadline for new contributions still stood as 6 April. The chair confirmed this and clarified that he would like to encourage potential contributors to highlight problems/issues that might require a new contribution as early as possible, thus giving the opportunity for members to work together as early as possible on providing harmonised contributions into the adhoc and then into the next TG meeting.

5. Action items

The chair reviewed the actions on the contributors, as listed under the notes relating to agenda item 2.

6. Next adhoc meeting planning

No further meetings were arranged at this time. The need for another meeting will be reviewed by the chair based on the email discussions and the number of new contributions received by the 6 April deadline.

2007-04-17

IEEE C802.16j-07/299

The meeting was adjourned at 15:27 GMT+1.
