Re:	MBWA Call for Contributions: Session # 2 - May 2003	
Abstract	The development of the 802.20 standard should adhere to established practices, wherein the work is carried out in four sequential stages: 1. Establish system and performance requirements. 2. Perform system requirements analyses. 3. Evaluate candidate proposals. 4. Write the standard based on the selected proposal.	
Purpose	Review and adopt.	
Notice	This document has been prepared to assist the IEEE 802.20 Working Group. It is offered as a basis for discussion and is not binding on the contributing individual(s) or organization(s). The material in this document is subject to change in form and content after further study. The contributor(s) reserve(s) the right to add, amend or withdraw material contained herein.	
Release	The contributor grants a free, irrevocable license to the IEEE to incorporate material contained in this contribution, and any modifications thereof, in the creation of an IEEE Standards publication; to copyright in the IEEE's name any IEEE Standards publication even though it may include portions of this contribution; and at the IEEE's sole discretion to permit others to reproduce in whole or in part the resulting IEEE Standards publication. The contributor also acknowledges and accepts that this contribution may be made public by IEEE 802.20.	
Patent Policy	The contributor is familiar with IEEE patent policy, as outlined in Section 6.3 of the IEEE-SA Standards Board Operations Manual < http://standards.ieee.org/guides/opman/sect6.html#6.3 > and in <i>Understanding Patent Issues During IEEE Standards Development</i> < http://standards.ieee.org/board/pat/guide.html >.	

1. Purpose

To establish the process that will assure an orderly and open development process for the 802.20 standard project.

2. 802.20 Development Process

The 802.20 standard should adhere to established practices, wherein the work is carried out in four sequential stages, as illustrated in figure 1:

1. Establish system and performance requirements.
2. Perform system requirements analyses.
3. Evaluate candidate proposals and select the best.
4. Write the standard, based on the selected proposal.

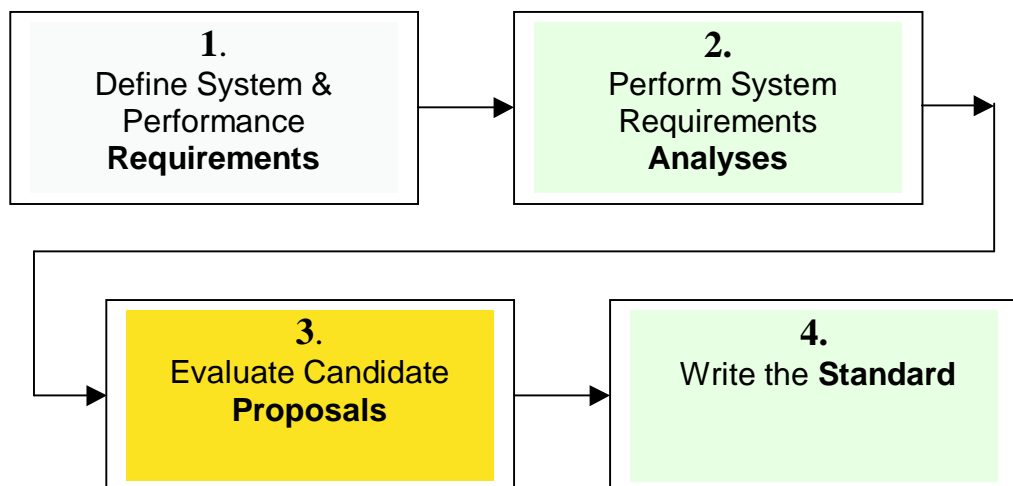

Figure 1. The Four Stages of Standard Development

3. Recommendations

Review, and adopt.
