The following slides are taken from these excellent presentations

What does the Study Group produce?

- 5 Criteria
 - Broad Market Potential, Compatibility, Distinct Identity, Technical Feasibility, Economic Feasibility
- PAR
 - Your “contract” with the IEEE-SA and “authorization” to develop a standard
 - Broadly focuses on what the standard is that group will work on including scope, purpose, broad timeline (not a project plan)
 - Good idea to look at examples of prior projects
- Objectives
 - Your “contract” with 802.3
 - At a high level it is what the group will work on (and what it will not)
 - Somewhat more specific than the scope in the PAR

Final Thoughts

- Goal is to get to a Task Force
- To do that, focus on
 - Producing the objectives
 - Producing the PAR
 - Producing the 5 criteria
 - Work on building consensus
 - Leave the rest of it to the Task Force phase
 - Plenty of time to work on solutions
 - Plenty of time to debate the text of the solutions

Goals for the SG meeting

- Review/Refine/Complete/Modify the set of objectives for the Study Group
- Review feedback from other WGs on our documentation
- Review/Refine/Complete/Modify responses for the CSD (Criteria for Standards Development) as necessary
- Review/Refine/Complete/Modify the PAR
- Review presentations substantiating the above
