Comment (Annex 145B.1, page 281, line 21)

For clarity, to add drawings to Annex 145B.1 demonstrating the definition of parallel/staggered detection in 145.2.5.3 for CC_DET_SEQ.

We can do it by inserting it to the annex (Option 1 which is the preferred) or into the standard body (option 2).

Proposed remedy:

Option 1 (preferred):

Add the following text and drawings after line 21 on page 281.

Figure 145B-X1 shows a parallel detection, where detection occurs in the same Tdet window, and Figure 145B-X2 shows a staggered detection, where detection occurs in different Tdet windows.

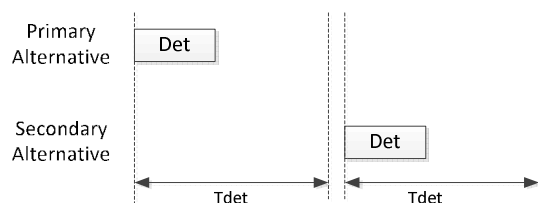

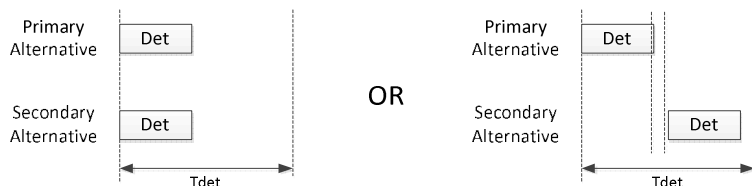

Figure 145B-X1—Parallel detection

Figure 145B-X2—Staggered detection

Option 2:

Add the following text and drawings after line 22 on page 119.
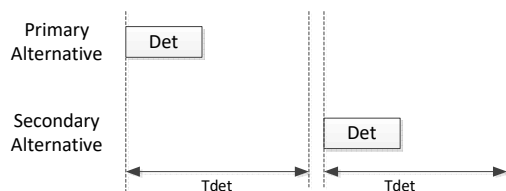

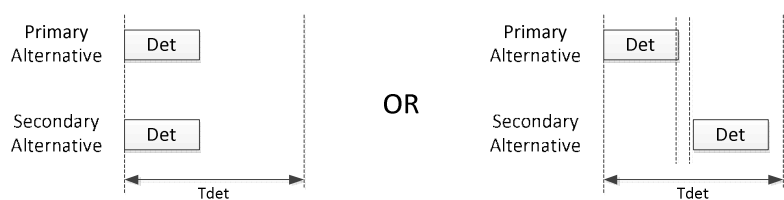

See Figure 145-X and Figure 145-Y.
