

## IEEE 802.3

### CU4HDD Study Group – Task Force Ad Hoc Minutes – 5-May-2016

Prepared by Dan Smith, acting chairman

Call began on 5/5/2016, at 11:07 AM, MT.

#### Agenda:

- Continuing Channel/Electrical discussion to try to complete that portion of the draft.

#### Preliminaries:

Patent statement was presented with no response from the participants.

#### Presentation/Discussion:

- Status was given by Peter on his latest contributions to 128.7 that have been sent to Yong and included in the newest working draft.
- Yong has incorporated comments from ‘major contributors’. If anyone wants to see intermediate PDFs, Yong will provide. He will be including all of William’s contributions by the end of this week (May 6/7/8). Any stable drawings and cross references will be included. There should be a fresh PDF of the draft by the May 24/25 Interim meeting.
- Dan will issue another broadcast to 802.3 stating the upcoming comment deadline – we have received no comments, except from the Task Force contributors. Is ‘no news, good news’?
- Yong briefly explored the *TBDs* in the current draft with suggestions for proceeding. He asked everyone to go through the *TDBs* in the clauses and annexes. If you encounter a ‘??’ mark and understand the number to be accurate, please add a comment note to that effect, allowing us to move on.
- June 27<sup>th</sup> meeting close, there should be ‘no’ technical holes in the parameters. Otherwise, we will not meeting the July Interim deadline to have the draft ready for Working Group Ballot. Our Working Group comments can ‘tweak’ those, but we need to have all values in place. No open topics out of the June 27<sup>th</sup> interim in Mountain View.
  - If you haven’t responded to Rita about the attending the meeting on June 27<sup>th</sup>, please contact her.
- At the July Plenary in San Diego, we may want to meet Monday morning, Tuesday, Wednesday, and Thursday morning, if we need more time to finalize the draft before Working Group Ballot release. But... we will discuss need for those days at the May 24/25 meeting in Whistler, when we see how much is accomplished by then. We expect the technical details of the draft to have settled by then, reducing the workload at the July Plenary.

Adjourned: 11:50 AM, MT time, Next call, Thursday, May 12, 2016.

## Attendees:

Name	Affiliation	Attended 4/21/2016	Attended 4/28/2016	Attended 5/5/2016
